General Chemistry Mar 13 2021 "General Chemistry: Atoms First," Second Edition starts from the building blocks of chemistry, the atom, allowing the authors to tell a cohesive story that progresses logically through molecules and compounds to help students intuitively follow complex concepts more logically. This unified thread of ideas helps students build a better foundation and ultimately gain a deeper understanding of chemical concepts. Students can more easily understand the microscopic-to-macroscopic connections between unobservable atoms and the observable behavior of matter in daily life, and are brought immediately into real chemistry instead of being forced to memorize facts. Reflecting a true atoms first perspective, the Second Edition features experienced atoms-first authors, incorporates recommendations from a panel of atoms-first experts, and follows historical beliefs in teaching chemistry concepts based and real experimental data first. This approach distinguishes this text in the market based whereby other authors teach theory first, followed by experimental data.

Fundamentals of Organic Chemistry Dec 10 2020 Written for the short course—where content must be thorough, but to-the-point, FUNDAMENTALS OF ORGANIC CHEMISTRY, Sixth Edition, continues to provide an effective, clear, and readable introduction to the beauty and logic of organic chemistry. McMurry presents only those subjects needed for a brief course while maintaining the important pedagogical tools commonly found in larger books. With clear explanations, thought-provoking examples, and an innovative vertical format for explaining reaction mechanisms, FUNDAMENTALS takes a modern approach: primary organization is by functional group, beginning with the simple (alkanes) and progressing to the more complex. Within the primary organization, there is also an emphasis on explaining the fundamental mechanistic similarities of reactions. Through this approach, memorization is minimized and understanding is maximized. The sixth edition brings in new content that applies organic chemistry to students, for example all of the chapter openers have been changed and incorporate a model and photograph of an application of organic chemistry such as Taxol from the Pacific yew tree. The book introduces a running application in the Interlude boxes and in the problems relating agricultural chemicals intended to unify the subject further for students. All of the problems have been reorganized by topic to make easier to assign and review. New problem categories have been added. The new problem categories are "In the Field with Agrochemicals" and "In the Medicine Cabinet" to reinforce the focus on applications.

Chemistry Jul 05 2020 For two-semester or three-quarter courses in General Chemistry. McMurry/Fay helps students and professors get to the heart of chemistry more effectively and helps students see the connections to chemistry more clearly. McMurry/Fay is known for its smart and precise presentation that blends the quantitative and visual aspects of General Chemistry. The 5th edition of McMurry/Fay builds on this foundation making the right connections in general chemistry topically, visually, and quantitatively. Chemistry is mastered when students make the right connections in three key areas; topics that are related, conceptual reasoning with quantitative work, and the different modes of communicating information. McMurry/Fay breaks through the boundaries traditionally imposed by textbooks that have historically made it difficult for students to make these connections on their own. Topic Connections, Conceptual and Quantitative parallel presentation, and Text-Graphic Integration Objects make these critical connections clear and visible, so students see the chemistry the first time. When you see the connections, you see the chemistry. Students don't use textbooks exactly the same way they used them in the past. The new layout of MF5 was designed to map to the way students seek and process information, and is based on

conversations with students about the way they study.
