Milton Friedman on Economics Nov 30 2019 On his death in the autumn of 2006, Milton Friedman was lauded as "the grandmaster of free-market economic theory in the postwar era" by the New York Times and "the most influential economist of the second half of the 20th century" by the Economist. Winner of the Nobel Prize in Economics in 1976, Friedman was both a highly respected economist and a prominent public intellectual, the leader of a revolution in economic and political thought that argued robustly in favor of virtues of free markets and laissez-faire policies. Milton Friedman on Economics: Selected Papers collects a variety of Friedman's papers on topics in economics that were originally published in the Journal of Political Economy. Opening with Friedman's 1977 Nobel Lecture, the volume spans nearly the whole of his career, incorporating papers from as early as 1948 and as late as 1990. An excellent introduction to Friedman's economic thought, Milton Friedman will be essential for anyone tracing the course of twentieth-century economics and politics.

Economics and Australian Health Policy Jul 07 2020 A century ago, health services absorbed few resources and provided little benefit. Since then, advances in medical knowledge and techniques have escalated both the benefits and the costs. The affordability of health services is being questioned in even the richest countries, and the economic aspects of health policy have become ever more intrusive. Australia is no exception, with its health system now absorbing 19% of all government tax revenue. Familiarity with economic issues - such as how to assess health outcomes, how to assign resources efficiently and what financial arrangements will promote equity as well as efficiency - is essential to understanding health policy. This is especially so at a time when the economics of health care are being internationally re-examined, with new forms of competition, challenges to public ownership and case-mix funding of hospitals under scrutiny, and a re-evaluation of the benefits of pharmaceuticals and new technologies underway. Economics and Australian Health Policy offers this understanding to readers with and without formal economic training. It starts with an introduction to both the economic way of thinking about health systems, and the context in which those economic questions are raised - the structure of the Australian health system, its culture and its patterns of financial flows. It then describes and appraises from an economic perspective the major components of the system and the policy issues which arise. This collection has been specially commissioned to address both Australia's most pressing policy issues and the needs of public health and health economic policy-makers, academics, commentators and students. The list of contributors reads like a who's who in Australian health economics, who have been encouraged, clearly successfully, to write accessibly yet with authority and conviction.

Collected Papers in Theoretical Economics (Volume V): Economic Policy and Its Theoretical Bases Aug 20 2021 Effective policymaking is based on economics which is a blend of empiricism as well as theory. It needs to be grounded not only in data, statistics, and the regularities observed therein, but also analytics, deductive reasoning, and logic, which are the constituents of theory. Published during 2009-16, the seven years that Basu spent as a policymaker—first as chief economic adviser to the Government of India and then as chief economist of the World Bank—this volume draws on the work done by empirical economists and is rooted in analytics, even while addressing practical, down-to-earth problems. The papers having a direct bearing on economic policymaking in this quintessential compilation range from topics such as financial regulation, global policy coordination, aspects of the Indian economy like fiscal and monetary policy design, inflation management, food-grain policy and, more generally, the influence of theory on government policymaking. The volume addresses some of the most compelling challenges of our times, from the global financial crisis and sub-prime mortgage breakdown to corruption control and the design of interventions to provide subsidized food to the

disadvantaged segments of society.
