SYSTEMATIC INSTRUCTION IN READING FOR SPANISH-SPEAKING STUDENTS Dec 24 2021 Students whose first language is not English are the fastest-growing group in public schools in all regions of the United States. Almost 10 million children between the ages of five and 17 live in the homes and communities in which a language other than English is spoken and presently most schools in the U.S. are under-educating many English learners. The achievement of Hispanic

students needs to improve dramatically over the next five years and this book describes the cornerstone elements for bringing about this change. The initial chapter introduces direct instruction to be used with reading and literacy programs. Chapters 2 and 3 provide excellent review of the literature in language development and address developing language instruction, listening, and speaking with Spanish-speaking students and offers what a comprehensive language development program should look like. Chapter 4 reviews academic language and literacy instruction while the next addresses the components of instruction in Spanish. Chapter 6 offers lesson plan suggestions for Spanish-speaking students, while the following two sections discuss components that transfer and do not transfer in Spanish to English reading instruction. Chapter 9 reviews English language development and provides lesson plans for implementing SDAIE programs. Finally, Chapter 10 discusses two-way bilingual immersion and shares actual classroom schedules and lessons. This unique text will help in the preparation of primary grade teachers throughout the U.S. so that they may be successful with Hispanic students entering the public schools with little or no English background. It will also be a useful tool for school districts' staff development in addressing school improvement goals for increasing the achievement of Hispanic students.

Handbook of Research on Schools, Schooling and Human Development Jan 31 2020 Children spend more time in school than in any social institution outside the home. And schools probably exert more influence on children's development and life chances than any environment beyond the home and neighbourhood. The purpose of this book is to document some important ways schools influence children's development and to describe various models and methods for studying schooling effects. Key features include: Comprehensive Coverage - this is the first book to provide a comprehensive review of what is known about schools as a context for human development. Topical coverage ranges from theoretical foundations to investigative methodologies and from classroom-level influences such as teacher-student relations to broader influences such as school organization and educational policies. Cross-Disciplinary - this volume brings together the divergent perspectives, methods and findings of scholars from a variety of disciplines, among them educational psychology, developmental psychology, school psychology, social psychology, psychiatry, sociology, and educational policy. Chapter Structure - to ensure continuity, chapter authors describe 1) how schooling influences are conceptualized 2) identify their theoretical and methodological approaches 3) discuss the strengths and weaknesses of existing research and 4) highlight implications for future research, practice, and policy. Methodologies - chapters included in the text feature various methodologies including longitudinal studies, hierarchical linear models, experimental and quasi-

experimental designs, and mixed methods.

One Million Children Aug 27 2019 "This book provides a unique source of information, experience, and evidence that is essential for any educator or policymaker involved in planning afterschool programs for children." Robert E. Slavin, Codirector Center for Research on the Education of Students Placed at Risk Johns Hopkins University Raise the caliber of your afterschool program with these exemplary models and get outstanding results! Through a comprehensive review of various afterschool programs across the United States, respected authority on program effectiveness, Olatokunbo Fashola, sheds new light on "what works" to increase academic achievement during nonschool hours. Administrators, policymakers, teachers, and researchers can benefit from the examples of both the successes and the shortcomings encountered by their colleagues in the quest to create enhanced learning opportunities in safe and enriching environments. This unique resource provides a practical overview of the research and best practices that can be easily adapted and applied in the development of highly effective afterschool programs. A complete discussion of the purposes, functions, methodologies, implementation, and evaluation of numerous programs is provided and organized for quick reference. Building Effective Afterschool Programs features: Exploration of critical factors necessary for success, such as planning, training, structure, and content Step-by-step overview of how to create effective programs, from needs assessment to the effects of various types of programs on children Straightforward guidance on how to evaluate the

effectiveness of afterschool programs, including design models Real-life examples that can be implemented to build afterschool programs with specific goals, including literacy improvement, enrichment of nonremedial skills, enhancement of volunteer tutoring programs, and cultural and character development through community-based programs

Learning Disabilities and Related Disorders Oct 10 2020 Designed to help pre-service teachers and practicing professionals evaluate and aid students with disabilities, this comprehensive text is guided by three main principles: to aid in the assessment and evaluation of students with learning disabilities, to demonstrate Learning Disabled (LD) theory and its practical applications through the use of case studies, and to provide the most up-to-date information on recent developments and topics of debate in the field. The Tenth Edition continues to stress familiarity with state and national standards, specifically those from the Council for Exceptional Children (CEC). Web site icons are located in the text margins next to URLs for quick reference. Icons are also used to indicate when additional content on the given topic can be found on the text's web site. LD in Practice: Strategies for the General Education Classroom features throughout the text provide additional information for the general education teacher. The chapter on Attention Deficit Disorder includes information on neuro-developmental problems. Coverage of diversity is highlighted by callouts in the text. Houghton Mifflin Video Cases, four- to six-minute video modules presenting real classroom scenarios, enable students to observe the day-to-day challenges and rewards of teaching from the convenience of their computers. Available on the Online Teaching and Study Centers, HM Video Cases are enhanced by classroom artifacts, Viewing Questions, Interview Transcripts, Key Terms, and bonus video footage.

The Psychology of Illustration Jun 17 2021 From the earliest stages of elementary school to the advanced college level, various types of illustrations are included in educational materials in order to promote learning. These illustrative adjuncts are often profuse and, in many cases, they may be the most striking feature that distinguishes one set of learning materials from another. In addition, the perceived effectiveness of the illustrations clearly plays an important role in the marketing of many educational materials. Despite this pervasiveness and salience in education, there has never been a systematic effort to bring together the results of research on illustrations in order to provide some level of guidance to the developers of commercial learning materials. There is, however, a considerable research literature that is directly relevant to this aspect of education. The purpose of the present two volume set is to summarize and interpret the existing research literature that deals with the various educational functions of illustrations. In undertaking to produce an omnibus

reference work on psychological and instructional issues surrounding illustrated learning material, our paramount aim has been to stimulate closer collaboration between researchers, producers, and users of educational text. The problems associated with moving the findings of educational research into the realm of everyday practice have been perennial ones. While many researchers and practitioners are interested in fundamentally similar questions, they typically speak dissimilar languages, read different journals, and carry out their work under disparate ideologies.

Teaching Students with Mild Disabilities Dec 12 2020

2 Million Children Feb 11 2021 Based on a program that has benefited over 2 million children, this updated edition outlines steps for school reform and achievement through prevention, intervention, and assessment to promote reading.

Learning Disabilities May 17 2021 [The book] is an introductory text, written for both undergraduate and graduate students who are taking a first course in learning disabilities. It is designed to provide a view of the field of learning disabilities for present and future special teachers, regular teachers, school psychologists, administrators, language pathologists, counselors, and related professionals preparing to work with individuals with learning disabilities. This book is particularly designed for both preservice and inservice regular classroom teachers who are often

responsible for teaching students with learning disabilities in their classrooms. In addition, the text can serve parents seeking necessary background information to better understand the problems their children face.... Teachers need to understand the diverse theoretical approaches to the field, have knowledge of assessment procedures, possess skill in the art of clinical teaching, and develop familiarity with teaching techniques and materials. -Pref.

Does People Do It? Jun 05 2020 One of Oklahoma's most famous native sons, Fred Harris faced life's challenges with the same resolve as a favorite uncle: "Does people do it? If people does it, I can do it." In this engaging memoir, he describes how he met those challenges head-on. A child of the Great Depression, Harris grew up in the small town of Walters, Oklahoma, where he was born in a two-room house. He describes that upbringing and his initiation into state politics, and tells how he was elected to the U.S. Senate at the age of thirty-three. As he recounts his experiences in national politics, he yields an insightful look at the turbulent 1960s and 1970s. Earning a reputation as a "new populist," Harris chaired the national Democratic Party and was a serious presidential candidate. Along the way, he encountered such giants as Lyndon B. Johnson, Hubert Humphrey, and Robert F. Kennedy. Enlivening his account with firsthand conversations, Harris contributes to our understanding of the motivations and personalities of these figures—including the infamous tensions between Johnson and Kennedy. Despite rubbing elbows with such power brokers, Harris maintained his own reputation as a down-to-earth man of the people whose advocacy included American Indian causes. Harris accomplished much in his distinguished career, championing human rights at home and around the world. His masterfully written memoir attests to a philosophical consistency and humane liberalism that today are all too rare.
