(Booklist) The town of Norbold, England is famous for its low crime rate, thanks to the zero-tolerance policy of Chief Superintendent John Fountain. And Norbold's newest police recruit, Hazel Best, is happy to help keep it that way. But numbers never tell the whole story, do they? Jerome Cardy knew he was going to die. Pure, White, and Deadly Nov 01 2022 More than 40 years before Gary Taubes published *The Case Against Sugar*, John Yudkin published his now-classic exposé on the dangers of sugar—reissued here with a new introduction by Robert H. Lustig, the bestselling author of *Fat Chance*. Scientist John Yudkin was the first to sound the alarm about the excess of sugar in the diet of modern Americans. His classic exposé, *Pure, White, and Deadly*,

clearly and engagingly describes how sugar is damaging our bodies, why we eat so much of it, and what we can do to stop. He explores the ins and out of sugar, from the different types—is brown sugar really better than white?—to how it is hidden inside our everyday foods, and how it is harming our health. In 1972, Yudkin was mostly ignored by the health industry and media, but the events of the last forty years have proven him spectacularly right. Yudkin's insights are even more important and relevant now, with today's record levels of obesity, than when they were first published. Brought up-to-date by childhood obesity expert Dr. Robert H. Lustig, this emphatic treatise on the hidden dangers of sugar is essential reading for anyone concerned about their health, the health of their children, and the wellbeing of modern society.

Deadly Animals Mar 13 2021 Consider, if you can, the case

of Jacob Fowler, who heard what he thought was the sound of his own skull cracking between the jaws of a grizzly bear - only to discover that it was. Or the Arizonan jogger who ran a mile back to her car with a rabid fox clamped to her arm before driving to hospital for live-saving inoculations. Or the woman who was attacked by a hyena, dragged from her tent by her face and survived to tell of her ordeal. The dangers of the animal kingdom are the stuff of legend but the reality of man's vulnerability and of nature's savage power is far more various, improbable and chilling than even the most active imagination would fear. In this unique work of nature writing, you will encounter the most formidable predators on land and sea - as well as the most overlooked, bizarre and inventive hazards that mother nature has to offer. Meet the cougar that can leap 40 feet and clear 8-foot fences with a fully-grown deer in its jaws, the tapeworm that's been known to grow as long as 82 feet in the human gut and the elephant that single-handedly destroyed an oil tanker. Drawing on an enormous host of true encounters between man and beast, this is the world's most authoritative compendium of animal attacks on human beings. With mordant wit and expert timing, Gordon Grice provides a gripping journey to the dark side of the animal kingdom and a celebration of its humbling, savage glory. November's Fury Aug 18 2021 On Thursday, November 6, the Detroit News forecasted "moderate to brisk" winds for the Great Lakes. On Friday, the Port Huron Times-Herald predicted a "moderately severe" storm. Hourly the warnings became more and more dire. Weather forecasting was in its infancy, however, and radio communication was not much better; by the time it became clear that a freshwater hurricane of epic proportions was developing, the storm was well on its way to becoming the

deadliest in Great Lakes maritime history. The ultimate story of man versus nature, November's Fury recounts the dramatic events that unfolded over those four days in 1913, as captains eager—or at times forced—to finish the season tried to outrun the massive storm that sank, stranded, or demolished dozens of boats and claimed the lives of more than 250 sailors. This is an account of incredible seamanship under impossible conditions, of inexplicable blunders, heroic rescue efforts, and the sad aftermath of recovering bodies washed ashore and paying tribute to those lost at sea. It is a tragedy made all the more real by the voices of men—now long deceased—who sailed through and survived the storm, and by a remarkable array of photographs documenting the phenomenal damage this not-so-perfect storm wreaked. The consummate storyteller of Great Lakes lore, Michael Schumacher at long last brings this violent storm to terrifying life, from its first stirrings through its slow-mounting destructive fury to its profound aftereffects, many still felt to this day.

The Monsanto Papers Jun 03 2020 Lee Johnson was a man with simple dreams. All he wanted was a steady job and a nice home for his wife and children, something better than the hard life he knew growing up. He never imagined that he would become the face of a David-and-Goliath showdown against one of the world's most powerful corporate giants. But a workplace accident left Lee

doused in a toxic chemical and facing a deadly cancer that turned his life upside down. In 2018, the world watched as Lee was thrust to the forefront of one the most dramatic legal battles in recent history. The Monsanto Papers is the inside story of Lee Johnson's landmark lawsuit against Monsanto. For Lee, the case was a race against the clock, with doctors predicting he wouldn't survive long enough to take the witness stand. For the eclectic band of young, ambitious lawyers representing him, it was a matter of professional pride and personal risk, with millions of dollars and hard-earned reputations on the line. For the public at large, the lawsuit presented a question of corporate accountability. With enough money and influence, could a company endanger its customers, hide evidence, manipulate regulators, and get away with it all—for decades? Readers will be astounded by the depth of corruption uncovered, captivated by the shocking twists, and moved by Lee's quiet determination to see justice served. With gripping narrative force that reads like fiction, The Monsanto Papers takes readers behind the scenes of a grueling legal battle, pulling back the curtain on the frailties of the American court system and the lengths to which lawyers will go to fight corporate wrongdoing.

book of the Scholomance trilogy, the story of an unwilling dark sorceress who is destined to rewrite the rules of magic. FINALIST FOR THE LODESTAR AWARD • "The dark school of magic I've been waiting for."—Katherine Arden, author of the Winternight Trilogy I decided that Orion Lake needed to die after the second time he saved my life. Everyone loves Orion Lake. Everyone else, that is. Far as I'm concerned, he can keep his flashy combat magic to himself. I'm not joining his pack of adoring fans. I don't need help surviving the Scholomance, even if they do. Forget the hordes of monsters and cursed artifacts, I'm probably the most dangerous thing in the place. Just give me a chance and I'll level mountains and kill untold millions, make myself the dark queen of the world. At least, that's what the world expects. Most of the other students in here would be delighted if Orion killed me like one more evil thing that's crawled out of the drains. Sometimes I think they want me to turn into the evil witch they assume I am. The school certainly does. But the Scholomance isn't getting what it wants from me. And neither is Orion Lake. I may not be anyone's idea of the shining hero, but I'm going to make it out of this place alive, and I'm not going to slaughter thousands to do it, either. Although I'm giving serious consideration to just one. With flawless mastery, Naomi Novik creates a school bursting with magic like you've never seen before, and a heroine for the ages—a character so sharply

realized and so richly nuanced that she will live on in hearts and minds for generations to come. Pure, White and Deadly Sep 26 2019

Pure, White and Deadly Aug 30 2022 Sugar. It's killing us. Why do we eat so much of it? What are its hidden dangers? In 1972, when British scientist John Yudkin first proved that sugar was bad for our health, he was ignored by the majority of the medical profession and rubbished by the food industry. We should have heeded his warning. Today, 1 in 4 adults in the UK are overweight. There is an epidemic of obese six month olds around the globe. Sugar consumption has tripled since World War II. Using everyday language and a range of scientific evidence, Professor Yudkin explores the ins and out of sugar, from the different types - is brown sugar really better than white? - to how it is hidden inside our everyday foods, and how it is damaging our health. Brought up-to-date by childhood obesity expert Dr Robert Lustig M.D., his classic exposé on the hidden dangers of sugar is essential reading for anyone interested in their health, the health of their children and the health of modern society. '[A] valiant . . . attempt to warn us against our

lust for sucrose' Geoff Watts, British Medical Journal ' A medical classic' Jack Winkler, Nutrition Policy Unit, London Metropolitan University 'Arguably the leading nutritionist of his time' Guardian 'Yudkin was far ahead of his time with his idea of nutrition as a subject of great breadth: not just the study of the composition of foods, but the importance of enjoying a variety of fresh foods, and the recognition of the psychological and social factors that cause us to choose certain foods and avoid others' Independent 'Worldwide, around 180million tonnes of refined sugar is produced each year and the UK market alone is worth nearly £1billion. Little wonder that no one listened to eminent nutritionist Professor John Yudkin when he called sugar 'pure, white and deadly' back in 1972 and quite rightly warned of the links between excessive consumption and heart disease' Catherine Collins, Principal Dietician, St George's Hospital John Yudkin (8 August 1910 - 12 July 1995) was a British physiologist and nutritionist, whose books include *This Slimming Business*, *Eat Well, Slim Well* and *This Nutrition Business*. He became internationally famous with his book *Pure, White and Deadly*, first published in 1972, and was one of the first scientists to claim that sugar was a major cause of obesity and heart disease. Robert H. Lustig, M.D. has spent the past sixteen years treating childhood obesity and studying the effects of sugar on the central nervous system and

metabolism. He is the Director of the UCSF Weight Assessment for Teen and Child Health Program and also a member of the Obesity Task Force of the Endocrine Society. His YouTube video lecture Sugar: The Bitter Truth has received over two million hits, he recently appeared on the BBC 2 documentary The Men Who Made Us Fat and his book Fat Chance: Beating the Odds Against Sugar, Processed Food, Obesity, and Disease is being published in Autumn 2012.

Forbidden Jun 23 2019 I'm used to demons and voodoo. What I was not prepared for was my life turning into a fairytale, complete with the Wicked Step Mother. My awful step mother is the Voodoo Queen of New Orleans. She's always hated me for being a Succubus. It just got a hundred times worse after my father died mysteriously. I inherited the family company, but I can't remove her as VP because she's made the entire board into her zombies. After another board meeting goes her way instead of mine, I decide to blow off a little steam with an intern from accounting. How was I supposed to know my really bad lay was her pet? I couldn't imagine my step mother giving anyone the time of day unless they have a certain number of zeros behind their net worth. She's out for blood. She warned me. She sent a shifter to finish me off on a deserted street in the Bywater district. I barely escape with my life. Luckily, I had been on my way to check out a sex dungeon that was under new management. I

manage to stumble there, bleeding everywhere. But I haven't gone through their vetting process and the bouncer is ready to kick me out on my ass. When I come to, I meet the seven new owners. They know me, but I don't know who or what they are. They aren't any supernatural creature I've met before. And that's when I find out. The new owners are actually the Seven Deadly Sins and they are in New Orleans to do some punishing. And my step mother has done a lot of sinning. All seven men want a crack at killing her and she's still out for my blood. I guess I'm plotting with the Seven Deadly Sins to take out my evil step mother. I haven't even dipped my toes in all the sinning she's gotten up to. I'm in totally over my head. Have you ever seen a walking sin? It's too much even for a Succubus. There are seven of them and I'm falling for all of them. Forbidden is a dark, adult retelling of Snow White. It contains scenes of consensual BDSM and one evil step mother.

[The Case Against Sugar](#) Jun 27 2022 From the best-selling author of *Why We Get Fat*, a groundbreaking, eye-opening exposé that makes the convincing case that sugar is the tobacco of the new millennium: backed by

powerful lobbies, entrenched in our lives, and making us very sick. Among Americans, diabetes is more prevalent today than ever; obesity is at epidemic proportions; nearly 10% of children are thought to have nonalcoholic fatty liver disease. And sugar is at the root of these, and other, critical society-wide, health-related problems. With his signature command of both science and straight talk, Gary Taubes delves into Americans' history with sugar: its uses as a preservative, as an additive in cigarettes, the contemporary overuse of high-fructose corn syrup. He explains what research has shown about our addiction to sweets. He clarifies the arguments against sugar, corrects misconceptions about the relationship between sugar and weight loss; and provides the perspective necessary to make informed decisions about sugar as individuals and as a society.

[Killers of the Flower Moon](#) Jan 29 2020 NATIONAL BOOK AWARD FINALIST • NATIONAL BESTSELLER • A twisting, haunting true-life murder mystery about one of the most monstrous crimes in American history, from the author of *The Lost City of Z*. In the 1920s, the richest people per capita in the world were members of the Osage Nation in Oklahoma. After oil was discovered beneath their land, the Osage rode in chauffeured automobiles, built mansions, and sent their children to study in Europe. Then, one by one, the Osage began to be killed off. The family of an Osage woman, Mollie Burkhart,

became a prime target. One of her relatives was shot. Another was poisoned. And it was just the beginning, as more and more Osage were dying under mysterious circumstances, and many of those who dared to investigate the killings were themselves murdered. As the death toll rose, the newly created FBI took up the case, and the young director, J. Edgar Hoover, turned to a former Texas Ranger named Tom White to try to unravel the mystery. White put together an undercover team, including a Native American agent who infiltrated the region, and together with the Osage began to expose one of the most chilling conspiracies in American history. The Cigarette Century Apr 01 2020 From agriculture to

big business, from medicine to politics, *The Cigarette Century* is the definitive account of how smoking came to be so deeply implicated in our culture, science, policy, and law. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. *The Cigarette Century* shows in striking detail how one ephemeral (and largely useless) product came to play such a dominant role in so many aspects of our lives—and deaths.

Pure, White and Deadly Sep 30 2022 Sugar. It is killing us. Why do we eat so much of it? What are its hidden dangers?

In 1972, when British scientist John Yudkin first proved that sugar was bad for our health, he was ignored by the majority of the medical profession and rubbished by the food industry. We should have heeded his warning. Today, one in four adults in the UK are overweight. There is an epidemic of obese six-month-olds around the globe. Sugar consumption has tripled since the Second World War. Using everyday language and a range of scientific evidence, Professor Yudkin explores the ins and out of sugar, from the different types - is brown sugar really better than white? - to how it is hidden inside our everyday foods and how it is damaging our health. Brought up to date by childhood obesity expert Dr Robert Lustig MD, his classic expose on the hidden dangers of sugar is essential reading for anyone interested in their health, the health of their children and the health of modern society."
