Contemporary Curating, Artistic Reference and Public Reception Oct 27 2019 Contemporary Curating, Artistic Reference and Public Reception undertakes a unique critical survey and analysis of prevailing group exhibition-making practices in Europe, the UK and North America. Drawing on curatorial literature and two in-depth case studies of group exhibitions, Bertrand advocates for a mode of curatorial practice that secures the content of artworks, in contrast to prevailing open-ended, indeterminate approaches. Proposing a third exhibition type beyond the current binary exhibition ontology that opposes art historical narratives to curatorial installations or Gesamtkunstwerk, the book directly tackles the enduring critique of curating as a mediating activity that produces sameness in group-exhibition contexts by establishing artistic equivalences. The book relies on the principles of analytical philosophy to assess how different exhibition-making approaches fix reference and determine artistic reception, reintroducing a standard to evaluate exhibitions beyond personal taste and thematic coherence. Bertrand ultimately proposes an alternative conception of practice that affirms the renewed relevance of the institutional group show in the present context. Contemporary Curating, Artistic Reference and Public Reception will be of interest to academics, researchers and students working in museum and curatorial studies, visual cultures, art theory and art history programmes. Art theorists and critics, as well as curators of contemporary art with a research-based practice, should also find much to interest them within the pages of the book.

Paediatric Parenteral Nutrition Feb 21 2022 Parenteral nutrition in general is required if nutritional needs cannot be met by oral or enteral feeding. In the paediatric patient, its initiation depends both on individual circumstances and the age and size of the infant or child. This compact reference work on parenteral nutrition in children is based on the 'Guidelines for Paediatric Parenteral Nutrition' that have been developed jointly by the European Society for Paediatric Gastroenterology, Hepatology and Nutrition (ESPGHAN) and the European Society for Clinical Nutrition and Metabolism (ESPEN), in collaboration with the European Society for Paediatric Research (ESPR). These guidelines were based on systematic literature reviews as well as a formal consensus process of a multidisciplinary panel of professionals. However, as a result of the scarcity of good quality clinical trials in children, many of the recommendations were extrapolated from adult studies and based on expert opinion. A detailed analysis of the available data was performed, and for each statement, the level of evidence and grade of recommendation was assessed. This reference guide has been conceived as an aid for the treating physician to assist him in the decision process, thus being a valuable companion in clinical practice.
