The Myers Collection of Egyptian Art at Eton College is widely-regarded as one of the most important, collections of small Egyptian artifacts in the world, yet the cache of about 3,000 statuettes of mortals and gods, mummy masks, jewellery and cosmetics, pottery, papyri and children's toys has been until now under-researched and unseen. Secrets of the Lost Races Jan 31 2020 An increasing number of historical and archaeological finds made around the world have been classified as out-of-place artifacts (ooparts). They have been called this because they appear unexpectedly among the ruins of the past with no evidence of a preceding period of development; their technological sophistication seems far beyond the capabilities of ancient peoples. Drawing on the literature and art of the Chaldeans, Sumerians, Babylonians and others, Rene Noorbergen's contention is that a superior race of man was responsible for these scientific marvels that bear testimony to a civilization with technology comparable to our own.

The final section is a useful reference for travelers to India, presenting the country's most important artistic and religious sites, complete with floor plans, close-up details of statues and works of art, and a wealth of photographs that walk us through the country's most significant monuments. Throughout the book, hundreds of images depict the jewelry, statuary, and other artifacts created during each epoch, revealing details of daily life, spiritual beliefs, changes in dress and fashion, advances in technology, and much more. The Treasures of Alexander the Great Nov 10 2020 War, the most profitable economic activity in the ancient world, transferred wealth violently from the vanquished to the victor. Invasions, massacres, confiscations, deportations, the sacking of cities, and the selling of survivors into slavery all redistributed property with epic consequences for kings and commoners alike. The most notable example occurred in the late fourth century BC, when Alexander the Great conquered the Persian Empire. For all of its savagery, this invasion has generally been heralded as a positive economic event for all concerned. Even those harshly critical of the king today tend to praise his plundering of Persia as a means of liberating the moribund resources of the East. To test that popular interpretation, this book investigates the kinds and quantities of treasure seized by the Macedonian king, from gold and silver to land and slaves. It reveals what became of the king's wealth, and what Alexander's redistribution of these vast resources can tell us about his much-disputed policies and personality.

The Hidden Treasures of the Ancient Qabalah May 17 2021 Strength and beauty are the two attractive elements of our nature, but the masculine strength and the feminine beauty are in reality one and the same thing. That which we admire as strength in the man is the same element that fascinates us as beauty in the woman. - from "The Feminine Elements in Man and Their Redeeming Power" Kabbalah, the "Secret Doctrine of the Jews," was for many centuries the exclusive province of religious scholars who could read the old Hebrew Chaldaic language in which it was set down in the 12th century, when its mysteries were already ancient. But the thirst for spiritual enlightenment in our complicated age ensured that its arcane wisdom would inevitably come to light. Here, in this 1918 edition, we can share in the beautiful insights of Kabbalah, into the difficulties of attaining peace, the dilemmas of justice and mercy, the need for spiritual regeneration, the soulful exploration of time and space, and the arcane paths of union with God. Anyone with a yearning for knowledge of the numinous and the serenity it brings will find succor here. ELIAS GEWURZ also wrote *Mysteries of the Qabalah* (1922) and *Beautiful Thoughts of the Ancient Hebrews* (1924).

Sacred Texts and Buried Treasures Sep 28 2019 The Japanese have long sought inspiration and legitimacy from the written record of their ancient past. The shaping of bygone eras to contemporary agendas began at least by the early eighth century, when the first court histories, namely the *Kojiki* and the *Nihon shoki*, were compiled. Since the late nineteenth century, historians have extensively mined these texts and other written evidence and by the late 1970s had nearly exhausted their meager sources. Fortunately for all those interested in uncovering the origins of Japanese civilization, archaeologists have been hard at work. Today, thanks to this postwar "archaeology boom," Japan historians have never been closer to recreating the lives of prehistoric peasants, ancient princes, and medieval samurai. *Sacred Texts and Buried Treasures* offers substantial new insights into early Japanese history (A.D. 100-800) through an integrated discussion of historical texts and archaeological artifacts. It contends that the rich archaeological discoveries of the past few decades permit scholars to develop far more satisfactory interpretations of ancient Japan than was possible when they were heavily dependent on written sources.

Hidden Treasures of the Egyptian Museum Jun 17 2021 The Egyptian Museum in Cairo, the greatest repository of ancient Egyptian

artifacts in the world, receives hundreds of thousands of visitors every year. But many of its treasures, long kept in basement storerooms or in magazines at archaeological sites around the country, or recently discovered at ongoing excavations, have never been seen by the general public. To celebrate the centenary of the Museum, many of these unknown pieces of exquisite beauty or great historical importance--and often both--have been brought out of the darkness to form a unique exhibition in a very appropriate setting: a converted section of the great basement storerooms of the Museum. With some 250 artifacts from the earliest beginnings of pharaonic culture to its latest flowerings, the exhibition spans the whole of ancient Egyptian history, and the one hundred masterpieces beautifully photographed for this volume represent the whole range of the exhibition: the Predynastic Period, the Old Kingdom, the First Intermediate Period, the Middle Kingdom, the Second Intermediate Period, the New Kingdom, the Third Intermediate Period, and the Late Period. This handsome book will serve as a prized memento for visitors to the exhibition and as a window onto it for Egyptophiles everywhere.

The Illustrated Guide to the Egyptian Museum in Cairo Mar 27 2022 An immense reservoir of art history, Cairo's Museum of Egyptian Antiquities contains fabulous collections of relics from the Mediterranean's most mysterious and ancient civilization, the true cradle of western culture. From the creation of the first state on the banks of the Nile to its submission to the Roman empire, the millennial story of ancient Egypt is recounted here through the artistic masterpieces, the everyday objects, the spectacular jewels, and the magnificent remains from the tombs of the pharaohs, all remarkably assembled within the walls of a single institution. Structured as a guide, but fully illustrated with superb color photographs, this book suggests a simple but comprehensive itinerary through the museum, subdividing the tour into chapters devoted to the most important episodes in Egyptian history. Collected during the course of over a century of archaeological excavations, jewelry, tools, toys, models, religious objects, mummies, and monumental sculptures offer vivid glimpses of a formidable civilization. The rich funerary cache of Tutankhamun, the treasures of Tanis, and the jewels of Queen Ahhotep reflect the glory of the Egyptian monarchy, but there are insights too into the day-to-day lives of the more humble sections of society. Previously unpublished photographs and plans alongside texts prepared by the museum curators themselves help readers to penetrate the corridors and halls of the great museum in search of a heritage unique in its richness and variety, following in the footsteps of the great figures in Egyptian history: from the pharaohs, suspended between heaven and earth, to the archaeologists who, with their patient excavations, have helped to shed new light on the land of the pyramids.

Loot Jul 19 2021 A journey across four continents to the heart of the conflict over who should own the great works of ancient art Why are the Elgin Marbles in London and not on the Acropolis? Why do there seem to be as many mummies in France as there are in Egypt? Why are so many Etruscan masterworks in America? For the past two centuries, the West has been plundering the treasures of the ancient world to fill its great museums, but in recent years, the countries where ancient civilizations originated have begun to push back, taking museums to court, prosecuting curators, and threatening to force the return of these priceless objects. Where do these treasures rightly belong? Sharon Waxman, a former culture reporter for *The New York Times* and a longtime foreign correspondent, brings us inside this high-stakes conflict, examining the implications for the preservation of the objects themselves and for how we understand our shared cultural heritage. Her journey takes readers from the great cities of Europe and America to Egypt, Turkey, Greece, and Italy, as these countries face down the Louvre, the Metropolitan Museum, the British Museum, and the J. Paul Getty Museum. She also introduces a cast of determined and implacable characters whose battles may strip these museums of some of their most cherished treasures. For readers who are fascinated by antiquity, who love to frequent museums, and who believe in the value of cultural exchange, *Loot* opens a new window on an enduring conflict.

Queen of Sheba Dec 12 2020 The Queen of Sheba is a famous legendary figure, first referred to in the Old Testament as bringing great riches to the court of Solomon. Later Jewish, Islamic, Ethiopian and Christian traditions dwell on different attributes, giving rise to a rich artistic vein, particularly but not exclusively in Renaissance and later art. The truth is that the Queen of Sheba remains an anonymous figure of legend associated with the land of Saba', one of the great early kingdoms of southern Arabia (present-day Yemen). The ancient caravan kingdoms of this region have fascinated travellers and scholars since the nineteenth century but our understanding of the history and culture of this region has been fundamentally revised as a result of new archaeological discoveries made in recent decades. This exhibition catalogue charts the story from the Queen of Sheba in art and legend to the archaeological

evidence for the historic kingdoms that gave rise to the legend. It contains twelve essays by leading scholars from Britain, USA, Canada and Europe. Over 300 items are described and illustrated in colour, ranging from little-known artworks in UK collections to antiquities from Yemen, mostly never previously exhibited in Britain and providing a magnificent record of the riches of southern Arabia. Book jacket.

In *Ancient Treasures*, you will read fascinating stories of lost hoards, looted archaeological artifacts, and sunken treasures, including: The Sevso Treasure, a hoard of large silver vessels from the late Roman Empire - estimated to be worth \$200 million - looted in the 1970s and sold on the black market. The Royal City of Susa Mar 03 2020 A rich production followed of objects for daily use, ritual, and luxury living, finely carved in various materials or fashioned of clay. Monumental sculpture was made in stone or bronze, and dramatic friezes were composed of brilliantly glazed bricks. Among the discoveries are tiny, intricately carved cylinder seals and splendid jewelry. Clay balls marked with symbols offer fascinating testimony to the very beginnings of writing; clay tablets from later periods bearing inscriptions in cuneiform record political history, literature, business transactions, and mathematical calculations. A very important group of finds from Susa is made up of objects brought back as booty from conquests in Mesopotamia. These works, many of them the royal monuments of Akkadian and Babylonian monarchs - for instance, the great stele of Naram-Sin - are among the best known of all objects from the ancient Near East.
