International interdisciplinary conference "Sketch a subculture" Apr 01 2020 Collected Papers of the International interdisciplinary conference "Sketch a subculture" Subcultures can be so tightly integrated into the contemporary person's daily life that they have become almost indispensable and ubiquitous. Family, job, agreements, responsibilities and negotiations are one thing, but, let us say, skydiving, or riding a bike in the company of motorcycle enthusiasts is a different thing—no less an important part of one's life. The current state of affairs is that almost everyone on this planet belongs to some subculture in one way or another. This another, natural part of one's lifestyle for pleasure is not always considered a "subculture," but the heart of the matter does not change because of this. To the point, a person might be a part of more than one subculture, and at the same time know nothing about what it may lead to; they may know nothing about the possible scenarios, goals and intentions of this environment. Even the most attractive and "mysteriously" formulated idea (for example, attaining Nirvana) remains something inconceivable, for what is "Nirvana," and how to understand that this state has been achieved is unknown. The idea has no explanations, no criteria and no parameters. And yet, this does not stop people from pursuing ideas as such. Many voluntarily strive for something they know practically nothing about. Why are subcultures so attractive? Why have they become magnets to researchers, professionals and business persons, among all others? These and many other questions require innovative approaches and an unbiased dialogue in an understandable scientific language. The International interdisciplinary conference "Sketch a subculture" united leading experts, scientists, researchers, practitioners, journalists, photographers and thinkers for this discussion on 6 different online panels, where the following questions were discussed: 1. Problems of choosing a research path in studying a subculture. 2. Plan of researching a subculture: from the idea to the completion of the research, from mythological and

religious to scientific and philosophical worldviews. 3. From mythologemes to ideas as foundational elements of subculture formation. Approaches for researching mythologemes that underlie the philosophy of a subculture. 4. Approaches for studying the hierarchy of subcultures. Can we claim that the hierarchical structure of all subcultures is identical? 5. Ways to explore the attributes and symbols of subcultures. 6. The phenomenon of "Subculture in Subculture" and characteristics of its study. The synthesis of ideas in the subculture, reasons for the existence of subcultures, invisible internal mechanisms that maintain their continuance. 7. Frederick Lawrence's drawing as the purpose of subculture research. 8. Can we consider a subculture as a machine that shapes a personality? The idea of death and different ways of implementing this idea by subcultures in daily life. 9. Frederick Lawrence's drawing, the theory of subculture formation, application of prototype method to understand phenomena. 10. Is it true that one idea forms a whole subculture? The pathway in subculture: fatal and successful. 11. The difference between subculture and religion. What are specific elements that shape each institution? 12. Use of religion by other social institutions (business, politics, etc.) for their own purposes. Religion transformation: from divine transcendence to the universal society based on techno-ideological principles.

La Fillette Triste Jan 29 2020 Un nuovo, letale virus sta colpendo gli utenti del peer to peer, ma non si tratta di un virus informatico. Una sindrome misteriosa, legata a un'antica leggenda e a una maledizione, sta mietendo vittime in tutta Europa a causa di un video casalingo distribuito random sul web, nel quale viene filmato l'omicidio di un'adolescente: nottetempo, chiunque abbia la sventura di osservare il filmato rimane orrendamente paralizzato, ma cosciente, fino al sopraggiungere di una morte lenta e angosciosa. Quando anche a Londra, Mae Ho e Nick Norwood vengono colpiti dal morbo misterioso, l'amico Lalo, con l'aiuto di un professore universitario e di un hacker informatico,

si metterà sulle tracce della maledizione che accompagna il video. Una ricerca che lo condurrà lontano e che lo porterà a rischiare la vita pur di trovare la soluzione a questo inspiegabile rompicapo. La Fillette Triste è un thriller che unisce archeologia e informatica, azione e divertimento. La soluzione del mistero si dipanerà a poco a poco in un susseguirsi di colpi di scena che lasceranno il lettore con il fiato sospeso, in un intreccio che unisce realtà e fantasia, archeologia, mitologia, psicologia.

*Sulle tracce di George Orwell in Birmania* Apr 13 2021 In Birmania gira una battuta popolare, secondo cui Orwell non scrisse soltanto un romanzo sul Paese, Giorni birmani, ma un'intera trilogia, completata da La fattoria degli animali e 1984. La connessione della Birmania (oggi chiamata Myanmar) con George Orwell non è metaforica, ma profonda e reale: sua madre era nata in Birmania al culmine del raj britannico e la nonna viveva ancora lì quando lui decise di arruolarsi. Alla scomparsa di Orwell, il romanzo in stesura trovato sulla sua scrivania era ambientato in Birmania. In un intrepido diario di viaggio dal taglio politico e biografico, Emma Larkin guida il lettore alla scoperta dei luoghi dove Orwell ha vissuto e lavorato come agente della Polizia imperiale britannica, vivendo esperienze che condizionarono profondamente la sua visione del mondo. Attraversando Mandalay e Yangon, le isolate aree meridionali del Delta dell'Irrawaddy e le montagne del nord dove gli inglesi andavano in villeggiatura per sfuggire al caldo delle pianure, l'autrice ritrae una Birmania appassionante e struggente. Prima colonizzata e in seguito governata da una giunta militare isolazionista e brutale, la nazione ha visto la propria storia e identità cancellate a più riprese da

metodi di governo orwelliani, che hanno soppresso libertà d'espressione e pensiero. Ispirata dalla chiarezza morale e dal rifiuto dell'ingiustizia di Orwell, l'autrice incontra persone che hanno trovato un modo di resistere agli effetti annientatori di uno dei più crudeli Stati di polizia, restituendo loro dignità. Questo libro è una chiave per riscoprire Orwell, appassionarsi alla Birmania e trovare gli strumenti per capire il travagliato e contraddittorio processo di democratizzazione in corso.

*Real Life and Real Economics* Nov 08 2020 Collected Papers of the International interdisciplinary conference "Real Life and the Real Economics" There are many insoluble paradoxes in the advanced and technologically driven 21st century. One of these cornerstone mysteries is the factual history of business, economics, and even day-to-day technologies. If it is considered that "money rules the

world," then why, is it the case, there is no single reasonable idea, how and where money came from? What was the progression of metamorphosis and transformations that allowed impersonal pieces of paper and electronic signals to become today the central exchange equivalent? There is no history of business, history of economy or history of human civilization. These categories simply do not exist as a reflection of scientifically established knowledge of laws. Many researchers, treading the pathway of obstacles derived from false data, simply give up in hopelessness. "Business is business!" is the verdict—a multifaceted conclusion and restless justification of why some suffer severe punishment for things that are authorized to others. These phenomena, these elements of our lives, did not arise "on their own." Everything has its history, its consistent tendency and its course of evolution. Business and its configuration were developed, designed, and commissioned by some on a global level. Who, in this case, is more competent to answer recurring questions about the true essence of business and economy? Certainly, immediate "architects" or creators. Unfortunately, the beginning and escalation of business took place several centuries ago, and it is not possible to find an architect and address to him any articulate questions. Nevertheless, we can bring together leading scholars, experts and practitioners from different fields of science and other spheres who have dedicated their professional activities to solving concrete business problems and untangling the oxymorons prevalent in the field. The International Interdisciplinary Conference "Real Life and Real Economics", united leading scholars, experts, practitioners, financial journalists and thinkers for the discussion on 6 different online panels, where the following questions were discussed: 1) History of business, technological history of our civilization, contradictions, distortions and invented stories. 2) Self-deception as the foundation of the modern world in Baudrillard's philosophy. 3) Origins of business consultants and the security field. 4) "Business heroes" of different times. 5)

Origins of business construction elements (human resources, marketing, etc.) 6) People and consumer society (Baudrillard), the place of a person in consumer society. 7) Examples of contradictions in the history of business and technological history. 8) What is the formula of a business? (Which sciences compose it). 9) Where we are at? Who controls the rate of change in industries? 10) How long will consumer society last? Could the ongoing consequences of the pandemic cease its existence? 11) Modern science and pre-modern science. Why are scholars of the XVI-XIX centuries no less inferior but in many ways superior to modern scholars? How do we explain this? 12) What is the mystery of the scientific origins of economics and business.

Delegating Responsibility Aug 25 2019 *Delegating Responsibility* explores the politics of migration in the European Union and explains how the EU responded to the 2015–17 refugee crisis. Based on 86 interviews and fieldwork in Greece and Italy, Nicholas R. Micinski proposes a new theory of international cooperation on international migration. States approach migration policies in many ways—such as coordination, collaboration, subcontracting, and unilateralism—but which policy they choose is based on capacity and on credible partners on the ground. Micinski traces the fifty-year evolution of EU migration management, like border security and asylum policies, and shows how EU officials used “crises” as political leverage to further Europeanize migration governance. In two in-depth case studies, he explains how Italy and Greece responded to the most recent refugee crisis. He concludes with a discussion of policy recommendations regarding contemporary as well as long-term aspirations for migration management in the EU.

**Geographies of Asylum in Europe and the Role of European Localities** Jun 23 2019 This open

access book describes how the numerous arrivals of asylum seekers since 2015 shaped reception and integration processes in Europe. It addresses the structuration of asylum and reception systems, and spaces and places of reception on European, national, regional and local level. It also analyses perceptions and discourses on asylum and refugees, their evolvement and the consequences for policy development. Furthermore, it examines practices and policy developments in the field of refugee reception and integration. The volume shows and explains a variety of refugee reception and integration strategies and practices as specific outcome of multilevel governance processes in Europe. By addressing and contextualizing those multiple experiences of asylum seeker reception, the book is a valuable contribution to the literature on migration and integration, societal development and political culture in Europe.

*Empire's Mobius Strip* Jul 17 2021 Italy's current crisis of Mediterranean migration and detention has its roots in early twentieth century imperial ambitions. *Empire's Mobius Strip* investigates how mobile populations were perceived to be major threats to Italian colonization, and how the state's historical mechanisms of control have resurfaced, with greater force, in today's refugee crisis. What is at stake in *Empire's Mobius Strip* is a deeper understanding of the forces driving those who move by choice and those who are moved. Stephanie Malia Hom focuses on Libya, considered Italy's most valuable colony, both politically and economically. Often perceived as the least of the great powers, Italian imperialism has been framed as something of "colonialism lite." But Italian colonizers carried out genocide between 1929–33, targeting nomadic Bedouin and marching almost 100,000 of them across the desert, incarcerating them in camps where more than half who entered died, simply because the Italians considered their way of life suspect. There are uncanny echoes with the situation of the Roma and migrants today. Hom explores three sites, in novella-like essays, where Italy's colonial past touches down in the present: the island, the camp, and the village. *Empire's Mobius Strip* brings into relief Italy's shifting constellations of mobility and empire, giving them space to surface, submerge, stretch out across time, and fold back on themselves like a Mobius strip. It deftly shows that mobility forges lasting connections between colonial imperialism and neoliberal empire, establishing Italy as a key site for the study of imperial formations in Europe and the Mediterranean.
