**Nurses' Work** Sep 06 2020 Designated a Doody's Core Title! Winner of an AJN Book of the Year Award! "Every nursing student and practicing nurse would benefit from reading this book." Score: 91, 4 stars --Doody's "The excerpts taken from original writings and events provide readers with a sneak peak into a forgotten world....This book is a must for anyone in the nursing profession. Essential. All levels."--Choice With contributions from some of the most renowned nursing scholars and historians, the real-life history of how nurses worked and how they endured the ever-changing economic, social, educational, and technological milieus is presented in a captivating collection of articles. Through time and place, experts chronicle the rich variety of nurses' work by presenting actual accounts of clinical practice experiences. Tracing the evolution of nursing from the role as family caregiver to roles in clinical practice today, the contributors approach this history by focusing on four thematic categories: Who does the work of nursing? Who pays for the work of nursing? What is the real work of nursing? How have our nursing predecessors struggled with the relationship between work and knowledge? Nurses' Work, provides an incredible collection of significant historical scholarship and contemporary themes that encourages us to understand and think these questions and the future of nursing.

**Therapeutic Recreation** Feb 09 2021 A long-standing tradition of excellence is extended in the Fourth Edition of this authoritative introduction to the field of therapeutic recreation. The authors effectively combine a broad orientation to the profession with the practical information necessary for students to become successful practitioners. Part I contains a comprehensive discussion of the field's history and theoretical underpinnings, providing students with the perspective they need to evaluate the social, cultural, demographic, economic, and technical forces that have shaped and are continuing to impact health and human services in general, and therapeutic recreation in particular. Part II introduces students to the client populations served by therapeutic recreation specialists and describes specific approaches and activities employed by TR professionals to help clients achieve meaningful improvements in health status, functional capacities, and quality of life. The authors have retained the practical, student-oriented approach that makes this an ideal text for introductory courses. They address all

content areas included in the NCTRC certification exam, are compatible with the American Psychiatric Association on psychological classifications, and incorporate the World Health Organization's international classification of functioning, disability, and health. The latest edition contains updated information on baby boomers, the obesity epidemic, and evidence-based practices; field-based photographs and illustrations; and study questions and exercises designed to engage students.

**Software Process Improvement: Metrics, Measurement, and Process Modelling** Mar 13 2021 C. Amting Directorate General Information Society, European Commission, Brussels Under the 4th Framework of European Research, the European Systems and Software Initiative (ESSI) was part of the ESPRIT Programme. This initiative funded more than 470 projects in the area of software and system process improvements. The majority of these projects were process improvement experiments carrying out and taking up new development processes, methods and technology within the software development process of a company. In addition, nodes (centres of expertise), European networks (organisations managing local activities), training and dissemination actions complemented the process improvement experiments. ESSI aimed at improving the software development capabilities of European enterprises. It focused on best practice and helped European companies to develop world class skills and associated technologies to build the increasingly complex and varied systems needed to compete in the marketplace. The dissemination activities were designed to build a forum, at European level, to exchange information and knowledge gained within process improvement experiments. Their major objective was to spread the message and the results of experiments to a wider audience, through a variety of different channels. The European Experience Exchange (~UR~X) project has been one of these dissemination activities within the European Systems and Software Initiative. ~UR~X has collected the results of practitioner reports from numerous workshops in Europe and presents, in this series of books, the results of Best Practice achievements in European Companies over the last few years.
