Millionaire by Thirty May 15 2021 Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of

money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

The North African Military Balance Apr 01 2020 There is no military balance in North Africa in the classic sense of the term. Although rivalries and tensions persist among Algeria, Libya, Morocco, and Tunisia, no state in the Maghreb now actively prepares for war with its neighbors, and the prospects of such conflicts are limited at best. Several countries have had border clashes in the past, and low-level incidents continue on the Algerian-Moroccan border. But none of these clashes has approached the point of serious conflict since these countries achieved independence in the 1950s and 1960s. Although several states in the Maghreb sent symbolic military support to past Arab forces in the Arab-Israeli conflict, these commitments have had no real military significance. Today, the military balance in North Africa consists largely of efforts to create forces that can maintain internal security, defend national borders, and enhance national prestige. Yet the states of North Africa are also adapting to the threats posed by terrorism, asymmetric warfare, and the proliferation of weapons of mass destruction. This comprehensive analysis examines the current force structures of Algeria, Libya, Morocco, and Tunisia—their armies, navies, air forces, and paramilitary and security forces. The authors show that many of these forces have grown beyond their nations' abilities to fund the equipment, manpower, training, logistics, infrastructure, and sustainability needed to make them effective. Finally, the authors assess the future patterns and trends in military development in the region.

How to Build a Boat Jun 03 2020 Part ode to building something with one's hands in the modern age, part celebration of the beauty and function of boats, and part moving father-daughter story, *How to Build a Boat* is a bold adventure. Once an essential skill, the ability to build a clinker boat, first innovated by the Vikings, can seem incomprehensible today. Yet it was the clinker, with its overlapping planks, that afforded us access to the oceans, and its construction has become a lost art that calls to the do-it-yourselfer in all of us. John Gornall heard the call. A thoroughly unskilled modern man, Gornall set out to build a traditional wooden boat as a gift for his newborn daughter. It was, he recognized, a ridiculously quixotic challenge for a man who knew little about woodworking and even less about boat-building. He wasn't even sure what type of wood he should use, the tools he'd need, or where on earth he'd build the boat. He had much to consider...and even more to learn. But, undaunted, he embarked on a voyage of rediscovery, determined to navigate his way back to a time when we could fashion our future and leave our mark on history using only time-honored skills and the materials at hand. His journey began in East Anglia, on England's rocky eastern coast. If all went according to plan, it would end with a great adventure, as father and daughter cast off together for a voyage of discovery that neither would forget, and both would treasure until the end of their days. *How to Build a Boat* celebrates the art of boat-building, the simple pleasures of working with your hands, and the aspirations and glory of new fatherhood. John Gornall "tells the inspiring story of how even the least skilled of us can make something wonderful if we invest enough time and love" (The Daily Mail) and taps into the allure of an ancient craft, interpreting it in a modern way, as tribute to the generations yet to come. "Both the book, and place, are magical" (The Sunday Telegraph).

La frontiera addosso Aug 30 2022 «Se l'Europa è una fortezza, e per molti una prigione, l'Italia può essere peggio di un incubo: può essere un brutto risveglio. Qualcosa da cui non puoi uscire. Una cintura militare fatta di armi, diritti negati, omicidio, carcere, tortura, disegna i confini attuali di tutta l'Europa, quelli che devono garantire il benessere di chi è all'interno. Questa è l'Europa. L'importante è che il meccanismo non sia troppo vistoso. L'importante è che tutto sia fatto prima che il nostro sguardo li intercetti. La frontiera non è più un luogo: è una colpa, una condanna, qualcosa che chi ha avuto la sfortuna di incontrare non si toglie mai più di dosso». Un libro coraggioso e provocatorio sulle violazioni dei diritti a danno di migliaia di migranti, storie di donne e uomini respinti da un continente intero. Donne e uomini a cui si nega accoglienza, su cui si spara alle frontiere d'Europa, donne e uomini rimpatriati in base ad accordi bilaterali poco trasparenti e spesso riconsegnati alle tragedie e ai carnefici a cui tentavano di sfuggire, donne e uomini a cui viene rifiutato lo status di rifugiati o anche solo la possibilità di avere un lavoro e una casa. Donne e uomini le cui vite dannate segnano la fine ingloriosa di una civiltà giuridica, quella delineata nei trattati internazionali, come la Convenzione di Ginevra o la Carta dei Diritti dell'Uomo, con cui il nostro mondo tentava di darsi un profilo migliore dopo le guerre mondiali. Insieme, in queste pagine, troveremo i dati del primo rapporto complessivo sul tema del diritto d'asilo in Europa commissionato da Caritas e Fondazione Migrantes, i dati delle istituzioni internazionali e delle organizzazioni non governative, l'operato dell'agenzia Frontex, le fonti del diritto internazionale, un glossario, un vademecum di buone pratiche, un vero e proprio manuale per ottenere il rifugio politico o per dare aiuto a chi richiede asilo e una rassegna degli accordi bilaterali tra gli Stati per la riammissione dei migranti.

Structural Design for Fire Safety Dec 10 2020 Structural Design for Fire Safety, 2nd edition Andrew H. Buchanan, University of Canterbury, New Zealand Anthony K. Abu, University of Canterbury, New Zealand A practical and informative guide to structural fire engineering This book presents a comprehensive overview of structural fire engineering. An update on the first edition, the book describes new developments in the past ten years, including advanced calculation methods and computer programs. Further additions include: calculation methods for membrane action in floor slabs exposed to fires; a chapter on composite steel-concrete construction; and case studies of structural collapses. The book begins with an introduction to fire safety in buildings, from fire growth and development to the devastating effects of severe fires on large building structures. Methods of calculating fire severity and fire resistance are then described in detail, together with both simple and advanced methods for assessing and designing for structural fire safety in buildings constructed from structural steel, reinforced concrete, or structural timber. Structural Design for Fire Safety, 2nd edition bridges the information gap between fire safety engineers, structural engineers and building officials, and it will be useful for many others including architects, code writers, building designers, and firefighters. Key features: • Updated references to current research, as well as new end-of-chapter questions and worked examples. • Authors experienced in teaching, researching, and applying structural fire engineering in real buildings. • A focus on basic principles rather than specific building code requirements, for an international audience. An essential guide for structural engineers who wish to improve their understanding of buildings exposed to severe fires and an ideal textbook for introductory or advanced courses in structural fire engineering.

Il mare di mezzo Nov 01 2022 Una coraggiosa esplorazione sulle due sponde del Mare Mediterraneo lungo le rotte dei viaggiatori di ieri e di oggi, di donne, uomini e non di rado bambini che cercano un futuro e trovano una barriera di acciaio e pregiudizio, alla mercè di mercanti di esseri umani, feroci carcerieri e crudeli accordi internazionali, come quello tra Italia e Libia. Il nuovo libro del fondatore di Fortress Europe, autore di "Mamadou va a morire" Sant'Agostino era africano. Oggi che ne sarebbe di lui? Forse respinto in Libia. Oppure disperso in mare. Magari rinchiuso in un centro di espulsione... Tre anni di inchieste, un viaggio tra memoria e attualità che vi farà trattenere il fiato dalla prima all'ultima pagina. Una raccolta di testimonianze e storie che fanno la storia. La nostra storia. E quella di un Mediterraneo sempre più blindato dalla paura dell'altro. Gabriele Del Grande – espulso dalla Tunisia e nella lista nera dei servizi segreti locali – si mette sulle tracce dei somali e degli eritrei respinti in Libia, facendo luce sul più misterioso naufragio mai verificatosi sulla rotta per l'Italia. La rete di informatori dell'Autore si allarga dalla costa meridionale del Mediterraneo all'Italia e ai centri di espulsione. Ne nascono inchieste su truffe e pestaggi. E parecchi guai. Ma – come insegnano i pescatori di Mazara – non ci si può girare dall'altra parte. E il viaggio alla ricerca della verità continua, dal Nilo al Burkina Faso. A noi scrittori non restano che le parole per sovvertire la realtà. Io ho scelto le parole del mio amato Mediterraneo, il Mare di Mezzo. Ho scelto le storie dei padri di Annaba e quelle dei padrini di Tunisi. Le storie delle diaspore di due ex colonie italiane come l'Eritrea e la Somalia negli anni dei respingimenti in Libia e quelle dei pescatori del Canale di Sicilia. Le storie degli italianitravirgolette che l'Italia manda via e quelle delle tante Italie nate senza fare rumore AilatiditaliA, nelle campagne marocchine, sul delta del Nilo e nei villaggi del Burkina Faso.
