International Finance in the New World Order Jan 18 2022 Some of the most important developments of the last quarter century relate to the internationalization of financial issues: the advent of free trade areas; the efforts of the European Union in establishing a single currency; burdens of international indebtedness; and the economic growth and development of nations. International financial systems are increasingly fragile and vulnerable in the face of possible international financial shock. Exchange rate issues and other changes in financial conditions have profound consequences not only for multinational corporations which have to devise new ways of managing their global operations, but also for firms and industries at the national level. The papers in this book confront these and other problems in international finance that have arisen in recent years, seeking to identify causal linkages at the global, national and company levels.

Reproduction in New World Primates Sep 21 2019 The New World primates are becoming widely used in scientific and medical work in fields from anthropology to zoology, behaviour to urology. They have unique attributes for studies in cancer, infectious diseases, genetics, virology and reproduction. However, it is only now that their reproductive physiology is being clarified in any depth and this book is a first synthesis of that knowledge. The nine authors involved in this project have presented an up to date account of the major New World species used in biological and medical science. In addition to their distribution and conservation in the wild, essential biological data from laboratory studies are presented on reproductive cycles, gestation length, seasonal breeding, puberty and other factors. The major applications of these species in research are explored. Whenever possible, research workers should steer away from using endangered species in their studies. The New World monkeys used in research in any numbers are still fairly common in the wild, yet their greatest advantages are in their small size and high fecundity. This makes possible the establishment of self sustaining captive breeding colonies at a fraction of the time and cost necessary for the more conventional Old World laboratory primates. Consequently the drain on wild stocks need not be extensive as only breeding nuclei should be necessary.

Puritans in the New World Nov 16 2021 Puritans in the New World tells the story of the powerful yet turbulent culture of the English people who embarked on an "errand into the wilderness." It presents the Puritans in their own words, shedding light on the lives both of great dissenters such as Roger Williams and Anne Hutchinson and of the orthodox leaders who contended against them. Classics of Puritan expression, like Mary Rowlandson's captivity narrative, Anne Bradstreet's poetry, and William Bradford's *Of Plymouth Plantation* appear alongside texts that are less well known but no less important: confessions of religious experience by lay people, the "diabolical" possession of a young woman, and the testimony of Native Americans who accept Christianity. Hall's chapter introductions provide a running history of Puritanism in seventeenth-century New England and alert readers to important scholarship. Above all, this is a collection of texts that vividly illuminates the experience of being a Puritan in the New World. The book will be welcomed by all those who are interested in early American literature, religion, and history.

China's New World Order Dec 05 2020 This discerning book examines China's newly developed soft-intervention policy towards North Korea, Myanmar and the two Sudans by examining China's diplomatic statements and behaviours. It also highlights the Chinese soft-intervention policy in economic manipulation and diplomatic persuasion in the recent generations of Chinese leadership under Hu Jintao and Xi Jinping.

New World Imagery Feb 19 2022 A national touring exhibition organised by the Hayward Gallery 1995-1996. Focuses on eight contemporary artists: David Boxer, Margaret Chen, Albert Chong, Leonard daley, Ras Dizzy, Milton George, Anna Henriques, Omari Ra.

Homo Luminous Oct 23 2019 David Werden wants nothing more than to lead a quiet, ordinary life. But his world is turned upside down when an unknown event changes the face of the planet. Realizing he cannot live alone in the ruins of the old world, and compelled by a strange internal force to reach the sea, he sets out on foot, carrying what he can, struggling against the harsh post-apocalyptic environment to search out others who may still be alive. Thrust into the leadership of a band of survivors, David struggles to scratch out the necessities of life while dealing with the staggering destruction and overwhelming sense of loss - and begins to understand the tragic and marvelous events that have occurred to the planet and to humanity itself. Finding love and betrayal, he must fight those who cling to the old world with all their strength and those who wish to stamp out the growing number of people coming to terms with their new levels of perception and insight into the Universal Mind.

A New World Oct 15 2021 Jim Meagher's world as a young man in the Irish-American neighborhood of Riverdale, New York, in the 1950s was a familiar and comfortable one, defined by family, church, school, and friendship. But was there something more to experience from life that could only be found outside those friendly confines? What if he could be a great man, with power and influence and riches? Life would soon take him beyond Riverdale—far beyond it—and teach him valuable lessons about duty, honor, and responsibility. Along the way, laughter and love would also be companions as Jim Meagher discovered the new world awaiting him beyond Brush Avenue—and also discovered that power and influence and riches are not always what a young man wants or needs.

Haiti In The New World Order Nov 23 2019 This book, a critical study of Haiti's place in the "New World Order," examines the limits of its

"democratic revolution" and the prospects for social change. Exploring why the successive military governments in power between 1986 and 1990 were unable to implement the neoliberal economic reforms sanctioned by the World Bank and USAID, Dupuy also an

Your Future in the New World of Communications Jun 18 2019 Discusses careers in the communications field, how to prepare for them, and how to get a job and succeed in it.

Writing the New World Jul 20 2019 In this volume, Mauro Caraccioli examines the natural history writings of early Spanish missionaries, using these texts to argue that colonial Latin America was fundamental in the development of modern political thought.

New World Cities Sep 02 2020 For millennia, urban centers were pivots of power and trade that ruled and linked rural majorities. After 1950, explosive urbanization led to unprecedented urban majorities around the world. That transformation--inextricably tied to rising globalization--changed almost everything for nearly everybody: production, politics, and daily lives. In this book, seven eminent scholars look at the similar but nevertheless divergent courses taken by Mexico City, Rio de Janeiro, Buenos Aires, Montreal, Los Angeles, and Houston in the twentieth century, attending to the challenges of rapid growth, the gains and limits of popular politics, and the profound local effects of a swiftly modernizing, globalizing economy. By exploring the rise of these six cities across five nations, *New World Cities* investigates the complexities of power and prosperity, difficulty and desperation, while reckoning with the social, cultural, and ethnic dynamics that mark all metropolitan areas. Contributors: Michele Dagenais, Mark Healey, Martin V. Melosi, Bryan McCann, Joseph A. Pratt, George J. Sanchez, and John Tutino.

Catalogue of New World Grasses (Poaceae) Jun 30 2020

American Megafaunal Extinctions at the End of the Pleistocene Feb 25 2020 The volume contains summaries of facts, theories, and unsolved problems pertaining to the unexplained extinction of dozens of genera of mostly large terrestrial mammals, which occurred ca. 13,000 calendar years ago in North America and about 1,000 years later in South America. Another equally mysterious wave of extinctions affected large Caribbean islands around 5,000 years ago. The coupling of these extinctions with the earliest appearance of human beings has led to the suggestion that foraging humans are to blame, although major climatic shifts were also taking place in the Americas during some of the extinctions. The last published volume with similar (but not identical) themes -- *Extinctions in Near Time* -- appeared in 1999; since then a great deal of innovative, exciting new research has been done but has not yet been compiled and summarized. Different chapters in this volume provide in-depth resums of the chronology of the extinctions in North and South America, the possible insights into animal ecology provided by studies of stable isotopes and anatomical/physiological characteristics such as growth increments in mammoth and mastodont tusks, the clues from taphonomic research about large-mammal biology, the applications of dating methods to the extinctions debate, and archeological controversies concerning human hunting of large mammals.

The New World of UN Peace Operations May 10 2021 Peace operations are the UN's flagship activity. Over the past decade, UN blue helmets have been dispatched to ever more challenging environments from the Congo to Timor to perform an expanding set of tasks. From protecting civilians in the midst of violent conflict to rebuilding state institutions after war, a new range of tasks has transformed the business of the blue helmets into an inherently knowledge-based venture. But all too often, the UN blue helmets, policemen, and other civilian officials have been "flying blind" in their efforts to stabilize countries ravaged by war. The UN realized the need to put knowledge, guidance and doctrine, and reflection on failures and successes at the center of the institution. Building on an innovative multi-disciplinary framework, this study provides a first comprehensive account of learning in peacekeeping. Covering the crucial past decade of expansion in peace operations, it zooms into a dozen cases of attempted learning across four crucial domains: police assistance, judicial reform, reintegration of former combatants, and mission integration. Throughout the different cases, the study analyzes the role of key variables as enablers and stumbling blocks for learning: bureaucratic politics, the learning infrastructure, leadership as well as power and interests of member states. Building on five years of research and access to key documents and decision-makers, the book presents a vivid portrait of an international bureaucracy struggling to turn itself into a learning organization. Aimed at policy-makers, diplomats, and a wide academic audience (including those working in international relations, peace research, political science, public administration, and organizational sociology), the book is an indispensable resource for anyone interested in the evolution of modern peace operations.

Paper Promises Jun 23 2022 A columnist for the Economist describes the consequences of the enormous amounts of unrepayable debt racked up by the United States and discusses what it means for the financial future of the country and its citizens.

The Old World, the New World, and the Creation of the Modern World, 1400-1650 Jan 26 2020 "The Old World, the New World, and the Creation of the Modern World, 1400-1650: An Interpretive History" provides a unique look at the early years of European discovery and colonization, examining the impact of this period on the historical development of both the New and Old Worlds. The text is enhanced by the incorporation of a wide variety of original source material, allowing readers to benefit from a more first-hand experience of the historical events of the period. Providing the essential facts in conjunction with expert analysis, the volume poses a number of important questions to enable readers to construct their own analysis of the evidence presented. Uniquely, the volume goes beyond the standard textbook formula of "what, when and where" to delve more deeply into the specific (as well as the wider) significance of historical developments, thereby providing the platform for a textured, interpretive understanding of the history of the Atlantic world.

The New World Government-Structure and Constitution May 22 2022 Two issues are bothering the humanity at present. Firstly, the contemporary national and international scenarios in socioeconomic, political, ethnic, and cultural domains are throwing up many issues, problems, and challenges relating to development, environment, human rights, human security, communal harmony, peaceful coexistence among nations, and world peace and security. Secondly, existing global institutions are proving to be wanting in their structures and authorities in solving these problems. Alternatively, a new global independent organization with enforcing authority is needed to act upon and solve these issues. The need for replacement of UNO seems to be justified because of failure to solve global problems. The nineteenth and twentieth centuries witnessed revivals of proposals for world government that were fueled by positive developments, such as technological progress in travel and communications that enabled rapid economic globalization as well as negative developments such as the devastating impact of wars fought with modern technology. The author's approach of the formation of the world parliament is through proportional representation of nation's parliaments, thus avoids direct election process for its formation. All the nations and their people's representatives are involved in the formation of the World Parliament and the world government. Based on this line of thinking, the structure for a new federal world government and the new federal world constitution are presented in this book.

Canadian Defence Industry in the New Global Environment Feb 07 2021 Alistair Edgar and David Haglund examine changes in the international demand for defence products in the post-Cold War era; review the reorganization and rationalization of the supply side of the international defence market through various government policy initiatives and corporate strategies; and discuss the ways in which the Canadian government and defence producers have attempted to cope with this new and uncertain international environment. They also explore the international and domestic contexts - military, economic, and political - within which defence industries operate. Edgar and Haglund's analysis draws on extensive interviews with political and industry leaders, military personnel, and government officials from Canada, the United States, the United Kingdom, France, Belgium, the Netherlands, Norway, Denmark, Spain, and Germany. This timely study of the domestic, American, and other NATO defence markets will interest scholars and students of Canadian defence policy, Canadian foreign policy, and Canadian external relations, and public servants, politicians, and personnel in the industry.

A History of the United States Atomic Energy Commission: The New World, 1939 Jun 11 2021

The New World Champion Paper Airplane Book Oct 27 2022 A collection of easy-to-fold paper airplane designs and innovative theories of flight, including the author's Guinness World Record-breaking airplane. Features 16 tear-out model planes. Will YOU be the next to break the WORLD RECORD? Anything is possible with *The New World Champion Paper Airplane Book*, the newest collection of designs and theories of flight from John M. Collins, the man behind the Guinness World Record-breaking distance plane. Featuring twenty-two unique airplane designs with step-by-step

instructional photos, plus tear-out models printed on regulation-weight paper stock, this entertaining and informative guide promises hours of flying fun. Take your paper airplane—making to the next level with features such as: · Instructions for folding “Suzanne,” the plane that shattered the previous world record by flying an unprecedented 226 feet, 10 inches, and garnered more than three million views on YouTube · Four “Follow Foil” aircraft that can stay aloft for minutes at a time · A pioneering cambered-wing plane · A primer on flight theory, and how it applies to paper airplanes · Tips for improving the accuracy and distance of your throws · The adjusting technique that helped break the record · And more!

Japan and the New World Order May 30 2020 Under the new world order, Japan's international business activity is being organised through tight networks that link banks, industrial corporations and trading companies and that are displacing onto Asia their main domestic problems. Since the US and Europe are refusing to fulfil that function, Japan is forming a new three-zone strategy in which production, marketing and finance are tightly coordinated within each zone but in which there is also an overall shift away from North America and Europe towards Asia.

Hernando Colon's New World of Books Apr 09 2021 The untold story of the greatest library of the Renaissance and its creator Hernando Colón ?This engaging book offers the first comprehensive account of the extraordinary projects of Hernando Colón, son of Christopher Columbus, which culminated in the creation of the greatest library of the Renaissance, with ambitions to be universal--that is, to bring together copies of every book, on every subject and in every language. Pérez Fernández and Wilson-Lee situate Hernando's projects within the rapidly changing landscape of early modern knowledge, providing a concise history of the collection of information and the origins of public libraries, examining the challenges he faced and the solutions he devised. The two authors combine "meticulous research with deep and original thought," shedding light on the history of libraries and the organization of knowledge. The result is an essential reference text for scholars of the early modern period, and for anyone interested in the expansion and dissemination of information and knowledge.

New World Monkeys Oct 03 2020 "This book is a broad synthesis of new world monkey evolution, integrating their unique evolutionary story into the bigger picture of primate evolution and Amazon biodiversity. Capsule For more than 30 million years, New World monkeys have inhabited the forests of South and Central America. Whether these primates originally came from Africa by rafting across the Atlantic or crossing overland from North America, they soon flourished. This book tells the story of these New World monkeys. Integrating data from fossil and living animals, it explores the evolution of the three major New World monkey lineages as well as how they fit into the broader story of primate evolution and Amazon biodiversity. After providing readers with necessary background in primate taxonomy and systematics, Rosenberger shows that the notion of adaptive zones is central to our understanding of primate evolution. The idea of adaptive zones can explain how radiations evolve, morphological adaptations appear, and communities form. From here, Rosenberger synthesizes what is known about New World monkeys' unique ecological adaptations, including those involving feeding and locomotion, as well as their social behaviour. The book's concluding chapters explore theories of how primates first arrived in South America and what their future looks like given the threat of extinction. Biography Internal Use Only Alfred L. Rosenberger is Professor Emeritus of Biological Anthropology at Brooklyn College. An expert on the origin and evolution of New World Monkeys, Rosenberger has contributed numerous articles in edited volumes and his work is published in journals such as Nature, Journal of Human Evolution and American Journal of Primatology . Audience The audience for this book is scholars and graduate students in biological/physical anthropolog and primatology, and to a lesser extent conservation biology, evolutionary biology, and behavioral ecology . Rationale - no copy text Other Relevant Info - no copy text"--

Blood of Requiem (Epic Fantasy, Dragons, Free Fantasy Novel) Jul 12 2021 Free epic fantasy novel! Song of Dragons -- a fantasy trilogy of blood, steel, and dragonfire. For fans of epic fantasy like A Game of Thrones and The Lord of the Rings. BOOK ONE: BLOOD OF REQUIEM Long ago stood the kingdom of Requiem, a land of men who could grow wings and scales, breathe fire, and take flight as dragons. Requiem ruled the sky. But Dies Irae, a tyrant leading an army of griffins, hunted Requiem's people, burned their forests, and shattered their temples. Requiem fell. This ancient land now lies in ruin, its halls crumbled, its cries silenced, its skeletons littering the burned earth. In the wilderness, a scattering of survivors lives in hiding. The griffins still hunt them, and every day promises death. Will Requiem's last children perish in exile... or once more become dragons and fly to war? Blood of Requiem -- a free epic fantasy novel for fans of dragons, A Game of Thrones, and swords and sorcery. _____ THE REQUIEM SERIES: Requiem: Dawn of Dragons Book 1: Requiem's Song Book 2: Requiem's Hope Book 3: Requiem's Prayer Requiem: Song of Dragons Book 1: Blood of Requiem Book 2: Tears of Requiem Book 3: Light of Requiem Requiem: Dragonlore Book 1: A Dawn of Dragonfire Book 2: A Day of Dragon Blood Book 3: A Night of Dragon Wings Requiem: The Dragon War Book 1: A Legacy of Light Book 2: A Birthright of Blood Book 3: A Memory of Fire Requiem: Requiem for Dragons Book 1: Dragons Lost Book 2: Dragons Reborn Book 3: Dragons Rising Requiem: Flame of Requiem Book 1: Forged in Dragonfire Book 2: Crown of Dragonfire Book 3: Pillars of Dragonfire Requiem: Dragonfire Rain Book 1: Blood of Dragons Book 2: Rage of Dragons Book 3: Flight of Dragons

The New World Order Mar 20 2022 What is the New World Order? Proponents say that it's an anticipated new era of global cooperation between diverse nations and cultures aimed at ushering in a utopia providing all the earth's citizens with everything they need. Detractors claim it's the systematic take-over by secret societies, quasi-government entities and corporations who are covertly organizing a global socialist all-powerful government which aims to regulate every aspect of citizens lives, rendering them a perpetual working-class while the elite leadership lives in luxury. Conspiracy theory expert Mark Dice looks at the evidence, claims, and conspiracy theories as he takes you down the rabbit hole to The New World Order. TOPICS: - Calls for a New World Order by Politicians and Businessmen. - World Governed by the Elite Through Occult Secret Societies - Mainstream Media Controlled by the Elite - High Level Officials and Institutions are Above the Law - Why Immorality and Destructive Behavior is Encouraged - Banking, Money, and Taxes - One World Currency - Population Reduction - One World Religion - A Coming Global Dictator Who Will Claim to be God - Global Police and Military Force - A Nation of Spies and Culture of Fear - Elimination of the Right to Bear Arms - Elimination of National Sovereignty - Monitoring the Population with Big Brother - A Medicated and Sedated Population - Weather Weapons and Chemtrails - Nephilim and Anunnaki - Satanism and Luciferianism - Underground Bases and Tunnels - And More By the author of The Illuminati: Facts & Fiction *Footprints and New Worlds* Aug 21 2019

Old Growth in a New World Dec 17 2021 Old-growth forests represent a lofty ideal as much as an ecosystem—an icon of unspoiled nature, ecological stability, and pristine habitat. These iconic notions have actively altered the way society relates to old-growth forests, catalyzing major changes in policy and management. But how appropriate are those changes and how well do they really serve in reaching conservation goals? Old Growth in a New World untangles the complexities of the old growth concept and the parallel complexity of old-growth policy and management. It brings together more than two dozen contributors—ecologists, economists, sociologists, managers, historians, silviculturists, environmentalists, timber producers, and philosophers—to offer a broad suite of perspectives on changes that have occurred in the valuing and management of old-growth forests in the Pacific Northwest over the past thirty years. The book • introduces the issues and history of old-growth values and conservation in the Pacific Northwest; • explores old growth through the ideas of leading ecologists and social scientists; • addresses the implications for the future management of old-growth forests and considers how evolving science and social knowledge might be used to increase conservation effectiveness. By confronting the complexity of the old-growth concept and associated policy and management challenges, Old Growth in a New World encourages productive discussion on the future of old growth in the Pacific Northwest and offers options for more effective approaches to conserving forest biodiversity.

The New World Nov 04 2020 Set four hundred years in the future, Frederick Turner's epic poem, *The New World*, celebrates American culture in A.D. 2376. As the book opens, the nation-state has been fragmented and replaced by new political forms: the Riots, violent anarchistic matriarchies, whose members are addicted to psychedelic joyjuice; the Burbs, populations descended from the old middle classes and now slaves to the Riots; the Mad Counties, religious theocracies dominated by fanatical fundamentalists; and the Free Counties, Jeffersonian democracies where arts and sciences flourish. Within this setting, Turner's epic tells the story of a tragic family feud involving Ruth Jefferson, daughter of the political leader, Shaker

McCloud; Antony Manse, a handsome aristocrat; Ruth's half-brother, the ambitious Simon Raven McCloud, who is under the influence of his grandmother, the witch Faith Raven; and the hero, James George Quincy. When banished from the Free Counties, the vengeful Simon Raven transforms himself into a messianic figure who inspires a league of Mad Counties to launch a holy war to annihilate the Free Counties. Turner's epic calls for a cultural commitment to transcend the contemporary choice between blind faith and hedonistic relativism. This bold work challenges many conventional assumptions about modern poetry and its relationship to other literary forms and the culture at large. Praise for Frederick Turner "This is a grand, glowing poem.... A thousand bravos " - James Merrill, Pulitzer Prize winning poet "The New World may be the first straight-forward heroic epic since Tennyson that really works. Turner's stroke of genius was to place the story in the future and tell it in a science-fiction mode. Suddenly all the epic formulas become not only permissible again but credible." - Dana Gioia "What astonishes me most is the way this poem builds and builds. To begin with, I was taking note of particular things that I found thrilling or delightful, but the deeper I got into the narrative, the more sustained the richness of it as a whole, and the seamless coherence of the tragic horror with the joyousness that I see as its central meaning. The poem inspires us to go back to the epics of the past, whose roots it shows us to be so much alive after all." - Amy Clampitt "If the use of epic poetry is to be more than a conceit, it has to be in the service of a tale for which it is better suited than the novel.... The epic poem] has historically enjoyed a greater ability to convey a culture's character and spirit through language. Turner uses the strengths of the epic form to good effect.... The New World is an ambitious work and Turner pulls off what he set out to accomplish: He's written good science fiction while creating and presenting a possible future in a way that a novel could not have accomplished. It's good poetry, too." - Dani Zweig "Myth, religious parable, and science fiction are genetically recombined into lyrical new forms of being. Turner has taken up the most ancient challenges of the poet, delivering work as intellectually charged as formally challenging." - Paul Lake "Frederick Turner comes across in his poems as a man of impressively broad experience, intellectual brilliance, and originality. His vocabulary alone is a tour de force. He's at his best when he unleashes his extraordinary powers of observation." - Richard Tillinghast

Strange New World Aug 01 2020 Nothing's scarier than a world where you can't be yourself. The second and final book in this high-stakes, fast-paced sci-fi series from New York Times bestselling author RACHEL VINCENT. Dahlia 16's life is a lie. The city of Lakeview isn't a utopia that raises individuals for the greater good; it is a clone farm that mass-produces servants for the elite. And because Dahlia breaks the rules, her sisters--the 4,999 girls who share her face--are destroyed. She and Trigger 17, the soldier who risked his life for hers, go on the run, escaping into the wild outside the city walls. But it turns out Dahlia has one remaining identical, one who shouldn't even exist. Waverly Whitmore is teenage royalty, a media sensation with millions of fans who broadcasts her every move--including every detail of her wedding planning, leading up to the day she marries Hennessy Chapman. Waverly lives a perfect life built on the labors of clones like Dahlia. She has no idea that she too is a clone . . . until she comes face to face with Dahlia. One deadly secret. Two genetic sisters. And a world that isn't big enough for both of them. "Thrilling and dangerous, with an ending that will leave you gasping!" --SUZANNE YOUNG, New York Times bestselling author of the series THE PROGRAM on book 1, Brave New Girl

Webster's New World Dictionary and Thesaurus Jan 06 2021 Completely revised from the previous edition. Increased page count More dictionary entries - 61,000 total 13,000 thesaurus entries 3,000 new dictionary terms, such as biscotti, dot.com, gene therapy, home page, no-brainer, portobello mushroom, skybox, surgicenter, veggie Revised design affords greater readability, with use of custom fonts Based on the authoritative Webster's New World College Dictionary, Fourth Edition

Iconographic Method in New World Prehistory Apr 28 2020 This book offers an overview of iconographic methods and their application to archaeological analysis. It offers a truly interdisciplinary approach that draws equally from art history and anthropology. Vernon James Knight, Jr begins with an historiographical overview, addressing the methodologies and theories that underpin both archaeology and art history. He then demonstrates how iconographic methods can be integrated with the scientific methods that are at the core of much archaeological inquiry. Focusing on artifacts from the pre-Columbian civilizations of North and Meso-American sites, Knight shows how the use of iconographic analysis yields new insights into these objects and civilizations.

The New World Champion Paper Airplane Book Sep 26 2022 A collection of easy-to-fold paper airplane designs and innovative theories of flight, including the author's Guinness World Record-breaking airplane. The World Wide Web and Contemporary Cultural Theory Mar 08 2021 First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.

The First Americans Aug 13 2021 J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, The First Americans is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

New Myth, New World Sep 14 2021
