Saxon Math 2 an Incremental Development Home Study Meeting Book Dec 29 2019 Saxon math programs produce confident students who are not only able to correctly compute, but also to apply concepts to new situations. These materials gently develop concepts, and the practice of those concepts is extended over a considerable period of time. This is called "incremental development and continual review." Material is introduced in easily understandable pieces (increments), allowing students to grasp one facet of a concept before the next one is introduced. Both facets are then practiced together until another one is introduced. This feature is combined with continual review in every lesson throughout the year. Topics are never dropped but are increased in complexity and practiced every day, providing the time required for concepts to become totally familiar. Each grade level has its own consumable meeting book, which is used during The Meeting at the beginning of each day. This first edition meeting book is for Grade 2.

Challenging Standards Aug 24 2019 The Common Core State Standards are at the center of the latest firestorm in American education reform. But this is not the nation's first torrid experience with standards implementation. In *Challenging Standards*, Jonathan Supovitz and James Spillane bring together the collective knowledge of top education researchers who have both experienced and investigated education reform challenges in the past. Combining both evidence-based research and applied knowledge, the contributors share with educational leaders their accrued wisdom about implementing standards in classrooms and systems, building capacity through relationships, and navigating the fractious political terrain. Each section of the book contains a set of facilitative questions that will help leadership teams, book clubs, and professional learning communities connect the chapters to their work.
