*Entrepreneurship and Economic Development* Mar 01 2020

Leading international scholars provide a timely reconsideration of how and why entrepreneurship matters for economic development, particularly in emerging and developing economies. The book critically dissects the evolving relationship between entrepreneurs and the state.

Routledge Handbook of Queer Development Studies Oct 08 2020

Around the world lesbian, gay, bisexual, trans, intersex and queer individuals are subjected to violence and intimidation based on their real or perceived sexuality, gender identity or expression. With those most at risk of human rights violations often living in areas of low economic development, questions of sexuality, gender identity, and expression have become a significant area of research within the field of development studies. The Routledge Handbook of Queer Development Studies is the first full length study of queer development studies, collecting the very best in research from around the world. Topics for discussion include: Queering policy and planning in development Queer development critique and queer critiques of development Global LGBTIQ rights Queer social movements and mobilizations At a time when

development and human rights organizations such as the World Bank, Office of the UN Secretary General and Human Rights Watch are placing increasing importance on global LGBT rights, the Routledge Handbook of Queer Development Studies is an essential guide for scholars, upper level students, practitioners and anyone with an interest in global sexualities, gender identities, and expressions.

*A Radical History of Development Studies* Nov 20 2021 In this book some of the leading thinkers in development studies trace the history of their multi-disciplinary subject from the late colonial period and its establishment during decolonization all the way through to its contemporary concerns with poverty reduction. They present a critical genealogy of development by looking at the contested evolution and roles of development institutions and exploring changes in development discourses. These recollections, by those who teach, research and practise development, challenge simplistic, unilinear periodizations of the evolution of the discipline, and draw attention to those ongoing critiques of development studies, including Marxism, feminism and postcolonialism, which so often have been marginalized in mainstream development discourse. The contributors combine personal and institutional reflections, with an examination of key themes, including gender and development, NGOs, and natural resource management. The book is radical in that it challenges orthodoxies of development theory and practice and highlights concealed, critical discourses that have been written out of conventional stories of development. The contributors provide different versions of the history of development by inscribing their experiences and interpretations, some from left-inclined intellectual perspectives. Their accounts elucidate a more complex and nuanced understanding of development studies over time, simultaneously revealing common themes and trends, and they also attempt to reposition Development Studies along a more critical trajectory.. The volume is intended to stimulate new

thinking on where the discipline may be moving. It ought also to be of great use to students coming to grips with the historical continuities and divergences in the theory and practice of development.

*The Essential Guide to Critical Development Studies* Jun 27 2022

The Essential Guide to Critical Development Studies provides an up-to-date and authoritative introduction to the field, challenging mainstream development discourse and the assumptions that underlie it. Critical development studies lays bare the economic, political, social, and environmental crises that characterise the current global capitalist system, proposing instead systemic change and different pathways for moving beyond capitalism into a new world of genuine progress where economic and social justice and ecological integrity prevail. In this book, the authors challenge market-driven, neoliberal development agendas, incorporating analyses of class, gender, race, and the dynamics of uneven capitalist development. This thoroughly revised and expanded second edition includes:

- 18 new chapters, including on topics such as philanthrocapitalism, race, the energy transition, Indigenous resistance and resilience, and global health
- Expanded global coverage, including new chapters on South Africa, North Africa, and the Gulf Arab states
- A new section on resistance and alternatives
- Additional pedagogical features, including a glossary of key terms, discussion questions, and expanded guides for further reading.

This textbook will be essential reading for students of global development, political science, sociology, economics, gender studies, geography, history, anthropology, agrarian studies, international political economy, and area studies. It will also be an important resource for development researchers, practitioners, and policymakers.

Theories and Practices of Development Sep 06 2020 Throughout the twentieth century, governments sought to achieve 'development' not only in their own countries, but also in other regions of the world; particularly in Africa, Asia, Latin America,

and the Caribbean. This focus on 'development' as a goal has continued into the twenty-first century, for example through the United Nations Millennium Development Targets. While development is often viewed as something very positive, it is also very important to consider the possible detrimental effects it may have on the natural environment, different social groups and on the cohesion and stability of societies. In this important book, Katie Willis investigates and places in a historical context, the development theories behind contemporary debates such as globalization and transnationalism. The main definitions of 'development' and 'development theory' are outlined with a description and explanation of how approaches have changed over time. The differing explanations of inequalities in development, both spatially and socially, and the reasoning behind different development policies are also considered. By drawing on pre-twentieth century European development theories and examining current policies in Europe and the USA, the book not only stresses commonalities in development theorizing over time and space, but also the importance of context in theory construction. This topical book provides an ideal introduction to development theories for students in geography, development studies, area studies, anthropology and sociology. It contains student-friendly features, including boxed case studies with examples, definitions, summary sections, suggestions for further reading, discussion questions and website information.

### **Social Protection in Developing Countries** Jun 23 2019

Providing universal access to social protection and health systems for all members of society, including the poor and vulnerable, is increasingly considered crucial to international development debates. This is the first book to explore from an interdisciplinary and global perspective the reforms of social protection systems introduced in recent years by many governments of low and middle-income countries. Although a growing body of literature has been concerned with the design and impact of social

protection, less attention has been directed towards analyzing and explaining these reform processes themselves. Through case studies of African, Asian, and Latin American countries, this book examines the 'global phenomenon' of recent social protection reforms in low and middle-income areas, and how it differs across countries both in terms of scope and speed of institutional change. Exploring the major domestic and international factors affecting the political feasibility of social protection reform, the book outlines the successes and failures of recent reform initiatives. This invaluable book combines contributions from both academics and practitioner experts to give students, researchers and practitioners in the fields of social security, economics, law and political science an in-depth understanding of political reform processes in developing countries.

**Comparative Development Studies** Apr 13 2021 A study of ethico-economic theorizing on socio-economic development, this book examines critically the views currently held by theoreticians' comprehensive concept of the world view in development theory, then reconsiders various global issues, both in theoretical and applied perspectives.

**Research for Development** Nov 08 2020 '[Research for Development] is well-written and, at every stage, is well-documented with practical examples. The simplicity with which it is written adds to its value in that non-professional persons get well-aquainted with the research process. Every chapter in the book ends with highlighting of the main points made in that chapter... A further strength of the book is the inclusion of an appendix with a list of websites that deal with issues in the area of development research... the simplicity of its organization and message should appeal to people/researchers across disciplines' - Pakistan Development Review 'Research for Development achieves the near impossible: it provides vast quantities of useful guidance for almost anyone involved in research for development regardless of the size of your research project or your role within

that project' - Arvac Bulletin `Written by professional researchers, this immensely practical book provides development workers with a more research-oriented point of view, so that they can avoid mistakes in the design of programmes. It will also help them to understand people's needs and respond accordingly' - The Asian Age `It is a beautiful and comprehensive compilation giving scores of instances that prove the essentiality if carrying out a survey of a particular locality for bringing about a change there' - Rafique Jalal, DAWN This book provides a comprehensive introduction and handbook for undertaking and managing research in development. It is designed to provide both a quick reference manual and an indispensable learning tool for all students, researchers and practitioners engaged in development work. The text is divided into two parts: Managing research for development, and Doing research for development. Together the two parts review the complete research process from outlining the essential role and purpose of research, highlighting specific issues to development research, to demonstrating how to evaluate and secure the best results from subsequent research projects. The book includes: an overview of different types of research in development work; practical steps to writing a brief and managing research; practical steps to evaluating and promoting research findings; step by step guides to getting started and choosing a research method; detailed guidelines to seven key research techniques; examples, exercises, summaries and checklists; and glossary and guides to additional resources and packages Drawing on considerable hands-on experience, Research for Development will be an essential companion and invaluable tool for anyone engaged in contemporary development research, development work and development studies.

**Culture and Cognitive Development** Sep 26 2019 Researchers examining children's mathematics acquisition are now questioning the belief that children learn mathematics principally through formalized, in-school mathematics education. There is

increasing evidence that children gain mathematical understanding through their participation in out-of-school cultural practices and that their mathematics only occasionally resembles what they learn in the classroom. Culture and Cognitive Development presents the latest research by Dr. Geoffrey Saxe on this issue. In examinations of the mathematical understandings of child candy sellers in an urban center in northeastern Brazil, Dr. Saxe finds sharp contrasts between mathematics as practiced in school and in real-world settings. In this unique research project he presents a penetrating conceptual treatment of the interplay between culture and cognitive development, filling a void in current research literature. Subjects examined include: the interplay between sociocultural and cognitive developmental processes the differences between math knowledge learned in and out of the classroom the ways math learning in the classroom is modified by children's out-of-school mathematics and, correspondingly, how practical out-of-school mathematics use is modified by formal education

**Selected Themes in African Development Studies** Dec 30 2019 Against the background of realities of underdevelopment and economic growth, environmental pressures and global governance challenges, this volume presents a broad picture of contemporary issues in African development. The multi-disciplinary collection presents a variety of important themes, covering land questions, housing, water, health, economic liberalization, climate, environment, and gender. The specific country studies illustrate the diversity of the African continent and demonstrate how unique contexts impact upon different levels of achievement. The volume seeks to present and promote novel analytical frameworks, new conceptual approaches, and empirical accounts of relevance to scholars studying Africa as well as practitioners in African development and policy makers. *Economics and Development Studies* Apr 25 2022 Development studies textbooks and courses have sometimes tended to avoid

significant economic content. However, without an understanding of the economic aspects of international development many of the more complex issues cannot be fully comprehended. Economics and Development Studies makes the economic dimension of discourse around controversial issues in international development accessible to second and third year undergraduate students working towards degrees in development studies. Following an introductory chapter outlining the connections between development economics and development studies, this book consists of eight substantive chapters dealing with the nature of development economics, economic growth and structural change, economic growth and developing countries, economic growth and economic development since 1960, the global economy and the Third World, developing countries and international trade, economics and development policy, and poverty, equality and development economists, with a tenth concluding chapter. This book synthesizes existing development economics literature in order to identify the salient issues and controversies and make them accessible and understandable. The concern is to distinguish differences within the economics profession, and between economists and non-economists, so that the reader can make informed judgments about the sources of these differences, and about their impact on policy analysis and policy advice. The book features explanatory text boxes, tables and diagrams, suggestions for further reading, and a listing of the economic concepts used in the chapters.

**Development Studies** Jul 29 2022 Clear, accessible and concise, this is an ideal primer for students unfamiliar with the central themes and theoretical perspectives in the study of development.

**Research and Fieldwork in Development** Jan 29 2020

Research and Fieldwork in Development explores both traditional and cutting edge research methods, from interviews and ethnography to spatial data and digital methods. Each chapter provides the reader with an understanding of the theoretical basis

of research methods, reflects upon their practice and outlines appropriate analysis techniques. The text also provides a cutting edge focus on the role of new media and technologies in conducting research. The final chapters return to a set of broader concerns in development research, providing a new and dynamic set of engagements with ethics and risk in fieldwork, integrating methods and engaging development research methods with knowledge exchange practices. Each chapter is supported by several case studies written by global experts within the field, documenting encounters and experiences and linking theory to practice. Each chapter is also complimented by an end of chapter summary, suggestions for further reading and websites, and questions for further reflection and practice. The text critically locates development research within the field of international development to give an accessible and comprehensive introduction to development research methods. This book provides an invaluable overview to the practice of international development research and serves as an essential resource for undergraduate and postgraduate student embarking of development fieldwork. It is supported by online resources including extended bibliographies for each chapter, example risk and ethic forms, example policy briefing notes, research reports, links to websites and data sources.

Handbook of Development Policy Studies Oct 27 2019

Considering the current challenges to human progress, this reference book examines recent theories, policies, and sectoral priorities, as well as various social, economic, and administrative factors that impact worldwide modernization and development. The book emphasizes the fact that communities must evaluate continuously and adjust their program

and narratives, methodologies and scientific impact, and perspectives from the Global South. The authors focus on social and democratic transformation, inclusive development and global environmental issues, and implications for research practices. Leading academics provide an excellent overview of recent insights for post-graduate students and scholars in these research areas.

**Critical Development Studies** Aug 18 2021 This book provides an overview of the key issues of development studies from a critical perspective: the nature of the global capitalist system and the dynamics associated with the development process, the outmigration and urbanization of rural areas, the formation of a global working class and the emergence of powerful resistance movements.

**Development Studies and Colonial Policy** May 03 2020 Sussex has a worldwide reputation for excellence in the field of development studies, and the University's Culture, Development and Environment Centre (CDE) within the School of Social Sciences and Cultural Studies plays a strong role in graduate teaching in this field. CDE is concerned not simply with 'development', but also more broadly with the common problems that have arisen through globalisation and the social, cultural, political, economic and environmental change that characterises our world. Our focus is also on the relationship between the 'North' and the 'South', including colonial.

**Business and Development Studies** Feb 09 2021 Business and Development Studies: Issues and Perspectives provides a comprehensive collection of cutting-edge theoretical and empirical contributions to the emerging field of business and development studies. Compared to more traditional business-school accounts of business in developing countries which focus on the challenges and opportunities of doing business in developing countries, this anthology explores whether, how, and under what conditions business contributes to the achievement of

economic, social, and environmental goals in developing countries. The book consolidates the current status of academic work on business and development, identifies state of the art in relation to this academic field, and establishes a future research agenda for 'business and development studies' as an emerging academic discipline within the social sciences. The book will be of interest to researchers and students, including economists, geographers, sociologists, political scientists, corporate social responsibility specialists, and development scholars who are seeking an in-depth overview of current debates about the role of business as a development agent in the Global South. The book is also of relevance to practitioners that are engaged in work with the private sector seeking to enhance the positive effects and minimize the negative economic, social, and environmental consequences of business activity in the Global South.

*Development Studies* Jul 25 2019 'Development Studies' brings together in a single accessible volume a representative and exciting set of readings on the nature of contemporary development issues. Using as its organizing theme the 'development debate' itself, this reader focuses on six main topic areas: theories and models of development, agricultural change and rural development, survival strategies and the weapons of the weak, industrialization and urbanization, the global political economy, and new directions in development studies, including democratization, environmental sustainability, and citizenship. The extracts included have been selected to provide a full sense of what development studies are all about. Each section is prefaced by an extensive editorial introduction to contextualize it within wider intellectual, historical and policy-related contexts, and to clarify its main points. Each closes with an extensive guide to further reading.

**Reclaiming Development Studies** Mar 13 2021 The mission, relevance and intellectual orientation of development studies is increasingly challenged from various fronts such as decoloniality,

'global development' and randomized control trials. The essays featured in this collection together argue for the need of the field to reclaim its critical political economy tradition. Building on the contributions of Ashwani Saith, the contributions touch upon many of the central questions of development studies centred around structural change, labour and inequality.

**Doing Development Research** Jun 15 2021 Doing Development Research is a comprehensive introduction to research in development studies, that provides thorough training for anyone carrying out research in developing countries. It brings together experts with extensive experience of overseas research, presenting an interdisciplinary guide to the core methodologies. Informed by years of research experience, Doing Development Research draws together many strands of action research and participatory methods, demonstrating their diverse applications and showing how they interrelate. The text provides: · an account of the theoretical approaches that underlie development work · an explanation of the practical issues involved in planning development research · a systematic overview of information and data collecting methods in three sub-sections: · methods of social research and associated forms of analysis · using existing knowledge and records · disseminating findings/research Using clear and uncomplicated language - illustrated with appropriate learning features throughout - the text guides the researcher through the choice of appropriate methods, the implementation of the research, and the communication of the findings to a range of audiences. This is the essential A-Z of development research.

**The Companion to Development Studies, 2nd Edition** Feb 21 2022 The Companion to Development Studies is an essential one-stop reference for anyone with an interest in development studies. Over 100 international experts have been brought together to present a comprehensive overview of the key theoretical and practical issues dominating contemporary development studies. Building on the success of the first edition,

the second edition of the Companion has been thoroughly revised and updated and includes new chapters on a range of topics, including ageing, culture and development, corruption and development and global terrorism. Each chapter summarises current debates and provides guidance for further reading and research. The Companion to Development Studies is indispensable for students of development studies at all levels, from undergraduate to postgraduate and beyond, in departments of development studies, geography, politics, international relations, sociology, social anthropology and economics.

*Introduction to Development Studies* Sep 18 2021 Written by Hennie Swanepoel and Frik de Beer(both based in South Africa) this development studies text, first published in 1997, is suitable for all introductory-level courses.

*Revolution in Development* Jul 05 2020 Revolution in Development uncovers the surprising influence of postrevolutionary Mexico on the twentieth century's most important international economic institutions. Drawing on extensive archival research in Mexico, the United States, and Great Britain, Christy Thornton meticulously traces how Mexican officials repeatedly rallied Third World leaders to campaign for representation in global organizations and redistribution through multilateral institutions. By decentering the United States and Europe in the history of global economic governance, Revolution in Development shows how Mexican economists, diplomats, and politicians fought for more than five decades to reform the rules and institutions of the global capitalist economy. In so doing, the book demonstrates, Mexican officials shaped not only their own domestic economic prospects but also the contours of the project of international development itself.

comprehensive coverage with an international perspective and in-depth analysis of all topics. Designed for class use and independent study, the book equips students with the skills needed to succeed in examination.

Translation Theory and Development Studies Oct 20 2021 This book aims to provide a philosophical underpinning to translation and relate translation to development. The second aim flows from the first section's argument that societies emerge out of, amongst others, complex translational interactions amongst individuals. It will do so by conceptualising translation from a complexity and emergence point of view and relating this view on emergent semiotics to some of the most recent social research. It will further fulfill its aims by providing empirical data from the South African context concerning the relationship between translation and development. The book intends to be interdisciplinary in nature and to foster interdisciplinary research and dialogue by relating the newest trends in translation theory, i.e. agency theory in the sociology of translation, to development theory within sociology. Data in the volume will be drawn from fields that have received very little if any attention in translation studies, i.e. local economic development, the knowledge economy and the informal economy.

**Capital Formation and Economic Development** Aug 06 2020 First published in 1964, this series of studies, compiled by the India team of Centre of International Studies at MIT, represents an important contribution to methods in planning for development, which will be of relevance to all those working in the field, irrespective of country. The results are demonstrated on examples taken from the Third Five-Year Plan and from some of the papers which underlay it.

**The Companion to Development Studies** Sep 30 2022 The Companion to Development Studies contains over a hundred chapters written by leading international experts within the field to provide a concise and authoritative overview of the key

theoretical and practical issues dominating contemporary development studies. Covering a wide range of disciplines the book is divided into ten sections, each prefaced by a section introduction written by the editors. The sections cover: the nature of development, theories and strategies of development, globalization and development, rural development, urbanization and development, environment and development, gender, health and education, the political economy of violence and insecurity, and governance and development. This third edition has been extensively updated and contains 45 new contributions from leading authorities, dealing with pressing contemporary issues such as race and development, ethics and development, BRICs and development, global financial crisis, the knowledge based economy and digital divide, food security, GM crops, comparative urbanism, cities and crime, energy, water hydrogeopolitics, climate change, disability, fragile states, global war on terror, ethnic conflict, legal rights to development, ecosystems services for development, just to name a few. Existing chapters have been thoroughly revised to include cutting-edge developments, and to present updated further reading and websites. The Companion to Development Studies presents concise overviews providing a gateway to further reading and a flexible resource for teaching and learning. It has established a role as essential reading for all students of development studies, as well as those in cognate areas of geography, international relations, politics, sociology, anthropology and economics.

*Geographies of Development* May 27 2022 Now in its fourth edition, *Geographies of Development: An Introduction to Development Studies* remains a core, balanced and comprehensive introductory textbook for students of Development Studies, Development Geography and related fields. This clear and concise text encourages critical engagement by integrating theory alongside practice and related key topics throughout. It demonstrates informatively that ideas concerning

development have been many and varied and highly contested - varying from time to time and from place to place. Clearly written and accessible for students, who have no prior knowledge of development, the book provides the basics in terms of a geographical approach to development what situation is, where, when and why. Over 200 maps, charts, tables, textboxes and pictures break up the text and offer alternative ways of showing the information. The text is further enhanced by a range of pedagogical features: chapter outlines, case studies, key thinkers, critical reflections, key points and summaries, discussion topics and further reading. Geographies of Development continues to be an invaluable introductory text not only for geography students, but also anyone in area studies, international studies and development studies.

**Design and Development Research** Jun 03 2020 AECT Design & Development Outstanding Book Award for 2008! Design and Development Research thoroughly discusses methods and strategies appropriate for conducting design and development research. Rich with examples and explanations, the book describes actual strategies that researchers have used to conduct two major types of design and development research: 1) product and tool research and 2) model research. Common challenges confronted by researchers in the field when planning and conducting a study are explored and procedural explanations are supported by a wide variety of examples taken from current literature. Samples of actual research tools are also presented. Important features in this volume include: concise checklists at the end of each chapter to give a clear summary of the steps involved in the various phases of a project; an examination of the critical types of information and data often gathered in studies, and unique procedures for collecting these data; examples of data collection instruments, as well as the use of technology in data collection; and a discussion of the process of extracting meaning from data and interpreting product and tool and model research.

findings. Design and Development Research is appropriate for both experienced researchers and those preparing to become researchers. It is intended for scholars interested in planning and conducting design and development research, and is intended to stimulate future thinking about methods, strategies, and issues related to the field.

*Transformation and Development* Aug 25 2019 This open access book features various studies on democratization, transformation, political and economic development, and security issues in the Organization for Security and Cooperation in Europe (OSCE) geographical region and beyond. Written by experts and academics in the fields of human rights, security, transformation and development, particularly in post-soviet and communist countries, it examines the status quo of regime development in various member states of the OSCE; their economic, security and human rights performance; institutional reforms and transformations and the challenges that these countries and their societies face, including the USA, Canada, Germany, Macedonia, Russia, Turkey, Kazakhstan, Kyrgyzstan and Mongolia. This is the 2019 edition of this Compilation Series of the OSCE Academy. The OSCE works to promote Minority Protection, Security, Democratic Development and Human Rights guided by the Office for Democratic Institutions and Human Rights (ODIHR), and to enhance securitization and development policies in Eurasia, Europe, Central Asia and North America. Since being founded in 1993, the OSCE and its agencies and departments have attracted a wealth of academic research in various fields and disciplines, ranging from economic development and election monitoring to enhancing global principles of human rights and securitization. About the OSCE Academy in Bishkek: Founded in 2004, the Academy offers post-Doc research fellowships and runs two Master Degrees, one in Economic Governance and Development and one in Politics and Security in Central Asia. The Academy's regular academic programs and conference contributes to

developing human professional capital in the sectors of particular importance for Central Asian states and societies. The Academy's graduates and visiting researchers contribute to economic development, governance and policy-making in Central Asia and beyond the OSCE region. Website:

**Doing Development Research** Nov 28 2019 An A-Z of development research, this interdisciplinary guide draws together many strands of action research and participatory methods, demonstrating their diverse applications and showing how they interrelate.

**The Elgar Companion to Development Studies** Jan 23 2022 If handbooks can be inspiring, this is it! Like a true companion, it takes in its stride conversations both big and small. Its entries do not just present an international and multidisciplinary mix, but true to life they work on several different scales. And, importantly, the book makes its authority evident. For it is like an extended website, but with all the added advantages of an encyclopaedia that actually tells you about the authors and the sources on which they have drawn. The resulting compilation is highly intelligent, thoughtful and above all usable. Dame Marilyn Strathern, University of Cambridge, UK The Elgar Companion to Development Studies is a major production in the development studies field, authored by a star-studded cast of contributors. With 136 entries covering a vast range of topics, it should quickly establish itself as a leading work of reference. We should all feel indebted to David Clark, who has successfully brought this substantial publishing project to completion. John Toye, University of Oxford, UK This is a most comprehensive handbook on development studies. It brings together a wide, varied array of carefully crafted summaries of 136 key topics in development by an international cast of well-respected academics and other experts in respective areas of study. The handbook is heavily interdisciplinary, organically combining economic, political,

historical, social, cultural, institutional, ethical, and human aspects of development. While the wide range of entries might appear as a simple glossary listing or an encyclopedic collection, each of the 136 entries offers more depth and discussion than the average handbook. . . . Viewed in this light, this companion is highly likely to become known as a leading reference work on the topic. Highly recommended. Ismael Hossein-Zadeh, Choice

The Elgar Companion to Development Studies is an innovative and unique reference book that includes original contributions covering development economics as well as development studies broadly defined. This major new Companion brings together an international panel of experts from varying backgrounds who discuss theoretical, ethical and practical issues relating to economic, social, cultural, institutional, political and human aspects of development in poor countries. It also includes a selection of intellectual biographies of leading development thinkers. While the Companion is organised along the lines of an encyclopaedia, each of its 136 entries provide more depth and discussion than the average reference book. Its entries are also extremely diverse: they draw on different social science disciplines, incorporate various mixes of theoretical and applied work, embrace a variety of methodologies and represent different views of the world. The Elgar Companion to Development Studies will therefore appeal to students, scholars, researchers, policymakers and practitioners in the field of development as well as the interested layman.

Development Studies in Regional Science Dec 10 2020 This book examines major policy and planning issues in development studies from the regional science perspective. It investigates questions such as: "How are communities able to deal with uncertainties raised by conflicts, technology, and external shocks in the process of development?"; "How can nations achieve sustainable development in terms of resource allocation and management?"; and "How can developing countries improve their

economic competitiveness while maintaining the objectives of equitable and coordinated growth among different regions?” using case studies that focus on different subfields, like infrastructure, environment, data science, sustainability and resilience. The book is organized in three parts. Part I clarifies fundamental issues regarding development studies and regional science in general, while Part II includes several case studies that address development-related opportunities and challenges with a focus on Asian countries. Lastly, Part III offers a global perspective and explores development experiences from countries throughout the world. Featuring contributions by leading academics and practitioners working at various organizations linked to international development, and including multidisciplinary analyses, the book appeals to students who are interested in development studies and regional science. It also offers planners and policymakers fresh insights into regional economic development.

**Understanding Development Economics** Dec 22 2021

Important parts of development practice, especially in key institutions such as the World Bank, are dominated by economists. In contrast, Development Studies is largely based upon multidisciplinary work in which anthropologists, human geographers, sociologists, and others play important roles. Hence, a tension has arisen between the claims made by Development Economics to be a scientific, measurable discipline prone to wide usage of mathematical modelling, and the more discursive, practice based approach favoured by Development Studies. The aim of this book is to show how the two disciplines have interacted, as well as how they differ. This is crucial in forming an understanding of development work, and to thinking about why policy recommendations can often lead to severe and continuing problems in developing countries. This book introduces Development Economics to those coming from two

different but linked perspectives; economists and students of development who are not economists. In both explaining and critiquing Development Economics, the book is able to suggest the implications of these findings for Development Studies, and more broadly, for development policy and its outcomes.

Introduction to Development Studies Nov 01 2022 This textbook helps students understand the fundamentals of development studies by adopting a multi-disciplinary approach. Introduction to Development Studies presents a balanced mix of economic, social, political, cultural and administrative premises of development and analyses its theoretical and practical dimensions. Through preceding and contemporary examples from developing countries, it provides a holistic understanding of development, effectively demonstrating how it differs from economic growth. Beginning with development theories, paradigms and actors involved in the development process, this book goes on to explain the concepts of development governance, management, communication and planning. It would prove to be an indispensable companion to students of economics, sociology, political science, public administration, public policy and other social science disciplines. Key Features - Presents an exhaustive treatment of 'development' from theoretical and practical perspectives - Covers three key aspects of contemporary development--development governance, development administration and development communication - Provides accessible and thematic explanation of the core concepts to engage students with/from various disciplinary backgrounds

**The Companion to Development Studies** Jul 17 2021 'The Companion to Development Studies' is an essential one-stop reference for anyone with an interest in development studies. The editors of this new volume have brought together an impressive range of international experts in the field to present an interdisciplinary and comprehensive overview of contemporary development studies. accessible guide for students and a direct route into the key issues of development studies. Divided into ten sections covering all the important areas in the field, including gender, violence and insecurity, environment, and agents of development, this timely new text provides easy-to-use summaries of all the major issues encountered in this fast-changing area.

**International Development Studies** Aug 30 2022 'A sure-footed and self-confident book, ambitious in scope, authoritative in execution and practical in its implications' - Simon Maxwell, Director, Overseas Development Institute, London 'At last, a development studies text that encourages self-reflection from within the discipline. Highly recommended' - Professor Ray Kiely, Chair in International Politics, Queen Mary University of London 'This is the book that academics, development researchers and practitioners have been seeking for a long time. [It] addresses the most important issues which development researchers and practitioners cope with each and every day' - Dr Tran Tuan, Director, Research and Training Centre for Community Development, Hanoi, Vietnam. 'An insightful book for both development practitioners and researchers alike' - Professor K.N. Nair, Director Centre for Development Studies, Kerala, India This book is about working professionally in Development Studies as a student, researcher or practitioner. It introduces and addresses the fundamental questions that everyone engaged with development must ask: " What is 'development' and why do we wish to study it? " How do the many theoretical, methodological and epistemological approaches relate to research and practical studies in development? " How are development research and practice linked? Accessibly written, with extensive use of case study material, this book is an essential primer for students of development studies who require a concise, penetrating overview of its foundations. It is also core reading for students and practitioners concerned with the design of studies in the course of policy analysis, sector reviews, or project formulation.

management and evaluation.

*Political Ecology* Apr 01 2020 This volume offers a unique, integrative perspective on the political and ecological processes shaping landscapes and resource use across the global North and South. Twelve carefully selected case studies demonstrate how contemporary geographical theories and methods can contribute to understanding key environment-and-development issues and working toward effective policies. Topics addressed include water and biodiversity resources, urban and national resource planning, scientific concepts of resource management, and ideas of nature and conservation in the context of globalization. Giving particular attention to evolving conceptions of nature-society interaction and geographical scale, an introduction and conclusion by the editors provide a clear analytical focus for the volume and summarize important developments and debates in the field.
