At Home with the Templetons Nov 08 2020 When the Templeton family takes up residence in an imposing and long-empty manor in the countryside of Victoria, Australia, the locals begin to buzz with gossip. The seven Templetons moved from England and seem unusual, peculiar even—especially when they begin to lead tours through the stately home while dressed in period costume. No one is more intrigued by the family than their neighbors, single mother Nina Donovan and her son, Tom. Though they try to keep their distance from the often shocking Templeton dramas, Nina and Tom find their lives unexpectedly entwined with this enigmatic family, much to the delight of Gracie, the youngest Templeton daughter. Then one day, a tragedy tears them all apart. In the grand estate, the stage is set for years of betrayal and heartbreak, love and affection, to be revealed—and, perhaps, resolved—as the Templetons try to make amends. At Home with the Templetons is Monica McInerney's best book yet—a captivating and moving story that spans two decades, illuminating the perils and pleasures of love, friendship, and family. BONUS: This edition contains excerpts from Monica McInerney's *Lola's Secret*, *The Faraday Girls*, *Family Baggage*, *The Alphabet Sisters*, *Greetings from Somewhere Else*, and *Upside Down Inside Out*.

Asymptotic and Hybrid Methods in Electromagnetics Aug 30 2022 Asymptotic methods provide considerable physical insight and understanding of diffraction mechanisms and are very useful in the design of electromagnetic devices such as radar targets and antennas. However, difficulties can arise when trying to solve problems using multipole and asymptotic methods together, such as in radar cross section objects. This new book offers a solution to this problem by combining these approaches into hybrid methods, therefore creating high demand for both understanding and learning how to apply asymptotic and hybrid methods to solve diffraction problems. The book provides the very latest and most comprehensive research on this subject.

Atheism Remix Jun 15 2021 A leading Christian intellectual explores the newest strain of atheism, its foremost thinkers, the cultural conditions that have bred it, and how Christians should respond. Something has changed in American culture. What for years was a little-regarded belief system—atheism—has now gained a large, and increasing, national hearing through the writings of "new atheists" such as Dawkins, Dennett, Harris, and Hitchens. Wanting to both inform and equip serious-minded Christians regarding this cultural shift, R. Albert Mohler Jr. explores the environment that has bred the "new atheism" while also introducing readers to the movement's four leading thinkers and the contours of their arguments. Mohler-deemed "the reigning intellectual of the evangelical movement in the US" by Time magazine—then uses this foundation to pinpoint eight major distinctives that make the new atheism new, and to discuss the future of Christianity in relationship to it. At school and in the community, Christians are sure to encounter people who have been shaped by this strain of atheism. Here is keen insight that any believer can use to understand and challenge the new atheists.

Atiyah's Introduction to the Law of Contract Sep 06 2020 Atiyah's Introduction to the Law of Contract is a well-known text through which thousands of university students have first encountered the law of contract, and the new edition has long been eagerly awaited by university teachers and students. This sixth edition, updated by Stephen Smith, continues to provide readers with an introduction to the theories, policies, and ideas that underlie the law, placing an equal emphasis on the law and critical analysis. In particular, the discussion of recent cases and legislation is centred on why contract law is the way it is, whether it can be justified, and, if not, what should be done to improve it. The sixth edition has been revised to place the law of contract in a modern context and to account for recent developments in the law, as well as those in academic thinking and writing. Addressing European influences and including perspectives from comparative law, this remains a stimulating and authoritative exposition of the modern law of contract.

[Asymptotic Safety and Black Holes](#) Jan 11 2021 One of the open challenges in fundamental physics is to combine Einstein's theory of general relativity with the principles of quantum mechanics. In this thesis, the question is raised whether metric quantum gravity could be fundamental in the spirit of Steven Weinberg's seminal asymptotic safety conjecture, and if so, what are the consequences for the physics of small, possibly Planck-size black holes? To address the first question, new techniques are provided which allow, for the first time, a self-consistent study of high-order polynomial actions including up to 34 powers in the Ricci scalar. These novel insights are then exploited to explain quantum gravity effects in black holes, including their horizon and causal structure, conformal scaling, evaporation, and the thermodynamics of quantum space-time. Results indicate upper limits on black hole temperature, and the existence of small black holes based on asymptotic safety for gravity and thermodynamic arguments.

At the Periphery of the Center Apr 01 2020 At the Periphery of the Center is the first comparison of two of France's most important twentieth-century authors, Julien Green and Marguerite Yourcenar. It examines textual elements in their plays and novels to draw conclusions about the ways that they represent homosexuality in their texts. Both Yourcenar and Green turned to drama to explore aspects of same-sex desire that they felt unable to express in their prose. The analysis of their plays shows that an emphasis on dialogue and action makes drama a particularly appropriate genre for writing about homosexuality because it affords an author distance and therefore protection from the "proclivities" of his characters. The chapters on the novel show, by contrast, how prose fiction allows an author to explain a character's sexuality with a degree of subtlety difficult to achieve in theatre. Variations in narration and paratext allow writers to avoid condemning discourses and to find an original means of expression instead. At the Periphery brings a new, textually centered approach to Green's and Yourcenar's works that is unlike the psychological analyses that often typify queer readings. It will be of great interest to scholars of twentieth-century French literature and of Gender Studies. The book will also appeal to non-academic readers, however, since it is about two French authors who were also American citizens and who wrote about US history and contemporary culture.
